The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 by modifying Class E surface airspace at Roberts Field, Redmond, OR, to remove the segment extending from the 5.1 mile radius of the airport to .9 miles west of the VORTAC. After a biennial review of the airspace, the FAA found this action necessary as the airspace is no longer needed. Class E airspace extending 700 feet above the surface would be modified with segments extending from the 7.6-mile radius of Roberts Field to 11.5 miles northeast and 15 miles southeast of the airport. Class E airspace designated as an extension to the Class D and Class E surface area would be modified by adding a segment extending from the 5.1-mile radius of Roberts Field to 3.5 miles southeast of the airport, and removing the segment from the 5.1 mile radius of the airport to .9 miles west of the VORTAC to accommodate RNAV (GPS) standard instrument approach procedures and for the safety and management of IFR operations at the airport.

Class E airspace designations are published in paragraph 6002, 6004 and 6005, respectively, of FAA Order 7400.9X, dated August 7, 2013, and effective September 15, 2013, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in this Order.

The FAA has determined this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation; (1) Is not a "significant regulatory action" under Executive Order 12866; (2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) Does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified this proposed rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106, describes the authority for

the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This proposed regulation is within the scope of that authority as it would modify controlled airspace at Roberts Field, Redmond, OR.

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1E, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R08–OAR–2014–0049; FRL–9906–42–Region–8]

Approval and Promulgation of Air Quality Implementation Plans; South Dakota; Prevention of Significant Deterioration; Greenhouse Gas Tailoring Rule Revisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to partially approve and partially disapprove revisions to the South Dakota State Implementation Plan (SIP) submitted by the South Dakota Department of Environment and Natural Resources (DENR) to EPA on June 20, 2011. The proposed SIP revisions address the permitting of sources of greenhouse gases (GHGs). Specifically, we propose to approve revisions to the State's Prevention of Significant Deterioration (PSD) program to incorporate the provisions of the federal PSD and Title V Greenhouse Gas Tailoring Rule

(Tailoring Rule). The proposed SIP revisions incorporate by reference the federal Tailoring Rule's emission thresholds for determining which new stationary sources and modifications to existing stationary sources become subject to South Dakota's PSD permitting requirements for their GHG emissions. EPA is proposing to disapprove a related provision that would rescind the State's Tailoring Rule revision in certain circumstances. EPA will take separate action on an amendment to the chapter Construction Permits for New Sources or Modifications in the June 20, 2011 submittal, regarding permits for minor sources. EPA is proposing this action under section 110 and part C of the Clean Air Act (the Act or CAA).
