Amendment of the Federal Docket Management System (EPA/GOV-2)

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: Pursuant to the provisions of the Privacy Act of 1974 (5 USC 552a), the Environmental Protection Agency (EPA) is giving notice that it is amending the Federal Docket Management System (FDMS) system of records to include additional categories of records. The amendment is required

to address additional categories of information collected from Freedom of Information Act (FOIA) requesters by some participating agencies and information voluntarily provided, even when not required. The categories of records in the system are being amended to include social security numbers, dates of birth for requesters, requester alias(es), alien numbers assigned to travelers crossing national borders and the requester's parents' names. The FOIA system, "FOIAonline", is a software application on the FDMS system infrastructure. The FOIAonline system is used by participating agencies to electronically receive, process, track and store requests from the public for federal records; post responsive records to a Web site; collect data for annual reporting requirements to the Department of Justice, and manage internal FOIA administration activities. In addition to the current FDMS functionalities, the FOIA system allows the public to submit and track FOIA requests and appeals; access requests and responsive records online, and obtain the status of requests filed with participating agencies.

DATES: Persons wishing to comment on this system of records notice must do so by March 31, 2014.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-HQ-OEI-2012-0483 by one of the following methods:

General Information

EPA is amending the Federal Docket Management System (FDMS) (System number: EPA-GOV-2) to include additional categories of records. The original system of record notice for FDMS was published in the **Federal Register** on March 24, 2005 and was amended on October 2, 2013 to add records collected in a Freedom of

Information Act (FOIA) system. The FDMS regulatory system contains **Federal Register** notices, materials supporting regulatory actions such as scientific and economic analyses, and public comments. The repository also contains dockets that are non-rulemaking. The system is used by 39 federal agencies that conduct rulemaking activities. Each agency is responsible for managing its own docket and rulemaking documents. An agency may share documents with other agencies or persons in addition to making them available to the public on the *regulations.gov* Web site. Each agency has sole responsibility for documents submitted in support of its rulemakings. These documents will be processed by the responsible agencies.

Some agencies require individuals to provide personally identifiable information when submitting a comment (e.g., name and contact information) that the agency can use if it experiences a problem receiving the comment or requires additional information to process the comment. A comment that meets all requirements of the recipient agency will be posted on the *regulations.gov* Web site for public viewing. All the contents of posted comments will be searchable. Each agency manages, accesses, and controls the information in the regulatory system that is submitted to it and maintains the sole ability to disclose the information it receives.

The FOIA system, FOIAonline, is used by participating agencies to administratively control and process requests for records in compliance with FOIA and to automate agency FOIA administration activities. FOIAonline provides a secure, login access Web site for agencies to receive and store requests; assign and process requests; post responses online; produce agencies' annual reports to the Department of Justice and manage FOIA requests electronically. The system allows the public to submit and track requests; search and download requests and responsive records; correspond with processing staff and file appeals as registered users. Each participating agency manages, accesses, and controls requests submitted to it through FOIAonline, including responding to requests for information in the possession of the agency and making information available in the system's repository of released records. The types of FOIA requests submitted to agencies by FOIA requesters vary according to an agency's mission as does the type of information an agency requires from requesters when they submit a FOIA. Social security numbers and other types

of personally identifiable information may be provided although not required. Agencies will ensure that sensitive PII is not made publicly available.

The name of a FOIA requester will be publicly available and searchable by the public based on an Agency's policies. With the exception of a requester's name, any other personally identifiable information provided by a requester during the process of completing the online request form or creating an online account (e.g., home addresses, email address and contact information) will not be posted to the Web site, nor will it be searchable by the public. Personally identifiable information determined to be publicly releasable and contained in documents released to the public under FOIA (e.g., the names and official contact information of government employees or the names of agency correspondents) will be publicly available and searchable by the public if posted by a participating agency based on their internal policies.
