II. Background and Purpose

The Coast Guard published a notice of proposed rulemaking (NPRM) in the **Federal Register** on November 28, 2014 entitled, “Requirements for MODUs and Other Vessels Conducting Outer Continental Shelf Activities With Dynamic Positioning Systems” (79 FR 70943). In the NPRM we stated our intention to hold a public meeting, and to publish a notice to announce the location and date of that meeting (79 FR 70944).

The proposed rule would establish minimum design, operation, training, and manning standards for MODUs and other vessels using dynamic positioning systems to engage in Outer Continental Shelf activities. Establishing these minimum standards is necessary to improve the safety of people and property involved in such operations, and the protection of the environment in which they operate. The rule would decrease the risk of a loss of position by a dynamically-positioned MODU or other vessel that could result in a fire, explosion, or subsea spill, and support the Coast Guard’s strategic goals of maritime safety and protection of natural resources.

We plan to record this meeting using an audio-digital recorder and to make that audio recording available through a link in our online docket. We will also provide a written summary of the meeting and comments and will place that summary in the docket.

III. Authority

This notice is issued under the authority of 5 U.S.C. 552(a).

Dated: March 4, 2015.

J.G. Lantz,

Director of Commercial Regulations and Standards, U.S. Coast Guard.
