SUPPLEMENTARY INFORMATION:

Title: Importation of Peppers From Certain Central American Countries.

OMB Control Number: 0579-0274.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests, including fruit flies, into the United States or their dissemination within the United States. Regulations authorized by the PPA concerning the importation of fruits and vegetables into the United States from certain parts of the world are contained in "Subpart—Fruits and Vegetables" (7 CFR 319.56-1 through 319.56-71).

In accordance with § 319.56-40, peppers from Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, and Panama are subject to certain conditions before entering the United States to prevent the introduction of plant pests into the United States. The regulations require the use of information collection activities, including inspections by national plant protection organization (NPPO) officials of the country of export; a bilateral workplan; production site registration; fruit fly trapping, monitoring, quality control program, and recordkeeping; box labeling; and a phytosanitary certificate.

When comparing the regulations to the information collection activities that were previously approved, we found that production site registration and the quality control program were omitted from the previous collection. By adding these activities to this information collection, the estimated annual number of responses per respondent has

increased from 3,226.65 to 21,947. We also found that we overestimated the burden hours for recordkeeping. In addition, the estimated annual number of respondents has decreased from 245 to 36. As a result of these factors, the estimated total annual burden on respondents decreased from 2,999 hours to 1,929 hours.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.00244 hours per response.

Respondents: Importers, NPPOs, growers, and shippers of peppers in Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, and Panama.

Estimated annual number of respondents: 36.

Estimated annual number of responses per respondent: 21,947.

Estimated annual number of responses: 790,092.

Estimated total annual burden on respondents: 1,929 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 18th day of March 2015.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

SUPPLEMENTARY INFORMATION:

Title: Importation of Fruits and Vegetables.

OMB Control Number: 0579–0264.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. This authority has been delegated to the Animal and Plant Health Inspection Service, which administers regulations to implement the PPA.

The regulations in “Subpart—Fruits and Vegetables” (7 CFR 319.56–1 through 319.56–71) allow a number of fruits and vegetables into the United States, under specified conditions, from certain parts of the world while continuing to protect against the introduction of pests into the United States. Under these regulations, the importation of a variety of fruits and vegetables from Belgium, Central America, China, the Dominican Republic, Jamaica, Jerusalem, the Netherlands, South America, and Trinidad and Tobago requires the use of phytosanitary certificates.

In our previous extension request for this collection, we included the information collection activities of trapping records and compliance agreements, which were specific to untreated citrus from Mexico. However, we have removed the collection activities for untreated citrus from Mexico from this collection because they are now listed under a different Office of Management and Budget (OMB) control number. As a result, the overall burden numbers for this collection have decreased.

We are asking OMB to approve our use of this information collection activity, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of Burden: The public reporting burden for this collection of information is estimated to average 0.25 hours per response.

Respondents: National plant protection organization officials of countries exporting to the United States.

Estimated Annual Number of Respondents: 12.

Estimated Annual Number of Responses per Respondent: 39.

Estimated Annual Number of Responses: 468.

Estimated Total Annual Burden on Respondents: 117 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 18th day of March 2015.
