(a) The Declaration of Conformity equipment authorization procedure, 47 CFR 2.1071, requires that a manufacturer or equipment supplier test a product to ensure compliance

with technical standards that limit radio frequency emissions.

(b) Additionally, the manufacturer or supplier must also include a DoC (with the standards) in the literature furnished with the equipment, and the equipment manufacturer or supplier must also make this statement of conformity and supporting technical data available to the FCC, at the Commission's request.

(c) The DoC procedure represents a simplified filing and reporting procedure for authorizing equipment for marketing.

(d) Finally, testing and documentation of compliance are needed to control potential interference to radio communications. The data gathering are necessary for investigating complaints of harmful interference or for verifying the manufacturer's compliance with the Commission's rules.
