II. Background

Cyanobacteria are naturally occurring organisms similar to algae. These organisms can occur in fresh water and may rapidly multiply causing “blooms” under favorable conditions. Conditions that enhance bloom formation and persistence include light intensity and duration, nutrient availability (such as nitrogen and phosphorus), water temperature, pH and water column stability. Some blooms produce cyanotoxins such as microcystin, cylindrospermopsin and anatoxin-a, which can be a health concern. For additional background information on cyanotoxins in drinking water, please go to: http://www2.epa.gov/sites/production/files/2014-08/documents/cyanobacteria_factsheet.pdf.

EPA is developing health advisories for two cyanotoxins: microcystin and cylindrospermopsin. A health advisory is an estimate of acceptable drinking water levels for a contaminant based on health effects and other information, and also provides recommended analytical and treatment techniques. Health advisories are intended to assist federal, state, and local officials and

public water system managers in achieving public health goals. A health advisory is not a legally enforceable standard under the Safe Drinking Water Act.

The focus of this public meeting is to gather input on additional information the Agency can provide to states and public water systems to help them prepare for and respond to potential cyanotoxin health concerns in drinking water.

Dated: April 20, 2015.

Peter Grevatt,

Director, Office of Ground Water and Drinking Water.

Abstract: As part of the Clean Air Act Amendments of 1990, the U.S. Congress required that each state establish a Small Business Stationary Source Technical and Environmental Compliance Assistance Program to assist small business in compliance with the Act. These programs are generally known as Small Business Environmental Assistance Programs (SBEAPs). EPA's Small Business Ombudsman must oversee the overall 507 program and be able to provide the Congress with periodical reports on the effectiveness, difficulties encountered and other relevant information about the program. Each state will submit requested information to EPA for compilation and summarization. This collection of information will assist the EPA Ombudsman with its requirement to monitor the effectiveness of small businesses as authorized under section 507(a), (d) and (e) of the Clean Air Act

as amended in 1990, Public Law 101–549, November 15, 1990. Information that is collected is aggregated and is not of a confidential nature. None of the information collected by this action results in/or requests sensitive information of any nature from the states.

Form Numbers: 6500–03.

Respondents/affected entities: State and/or state appointed entities of the 507 program.

Respondent's obligation to respond: Mandatory (section 507, parts (a), (d) and (e)).

Estimated number of respondents: 53 (total).

Frequency of response: Annual.

Total estimated burden: 2,120 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$112,106 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change of hours in the total estimated respondent burden compared with the ICR currently approved by OMB.
