The revisions read as follows:

§ 430.4 Control of *Listeria monocytogenes* in post-lethality exposed ready-to-eat products.

(a) *Listeria monocytogenes* can contaminate RTE products that are exposed to the environment after they have undergone a lethality treatment. *L. monocytogenes* is a hazard that an establishment producing post-lethality exposed RTE products must control through its HACCP plan or prevent in the processing environment through a Sanitation SOP or other prerequisite program. RTE product is adulterated if it contains *L. monocytogenes*, or if it comes into direct contact with a food contact surface that is contaminated with *L. monocytogenes*. Establishments must not release into commerce product that contains *L. monocytogenes* or that has been in contact with a food contact surface contaminated with *L. monocytogenes* without first reworking the product using a process that is destructive of *L. monocytogenes*.

(B) Identify the conditions under which the establishment will implement hold-and-test procedures following a positive test of a food-contact surface for an indicator organism;

* * * * *

(ii) * * *

(B) During this follow-up testing, if the establishment obtains a second

positive test for an indicator organism, the establishment must hold lots of product that may have become contaminated by contact with the food contact surface until the establishment corrects the problem indicated by the test result.

(C) In order to release into commerce product held under this section, the establishment must sample and test the lots for *L. monocytogenes* or an indicator organism using a sampling method and frequency that will provide a level of statistical confidence that ensures that each lot is not adulterated with *L. monocytogenes*. The establishment must document the results of this testing. Alternatively, the establishment may rework the held product using a process that is destructive of *L. monocytogenes* or the indicator organism.

The text of the Order is as follows:

Federal Housing Finance Agency

Order No. 2015-OR-B-1

Supplemental Order on Reporting by Regulated Entities of Stress Testing Results as of September 30, 2014

Whereas, pursuant to the Federal Housing Finance Agency's (FHFA) regulation implementing section 165(i)(2) of the Dodd-Frank Wall Street Reform and Consumer Protection Act requiring each regulated entity to conduct stress tests to determine whether it has the capital necessary to absorb losses resulting from adverse economic conditions and report the results "in the manner and form established by FHFA," 12 CFR 1238.5(b); and

Whereas, FHFA's rule implementing section 165(i)(2) of the Dodd-Frank Act is codified as 12 CFR part 1238 and requires that "[e]ach regulated entity must file a report in the manner and form established by FHFA," 12 CFR 1238.5(b); and

Whereas, FHFA's regulation requires that each regulated entity "disclose publicly a summary of the stress test results for the severely adverse scenario," 12 CFR 1238.7; and

Whereas, on November 14, 2014, FHFA issued to each regulated entity scenarios for stress testing as of September 30, 2014, and on December 1, 2014, issued Orders to each regulated entity together with Summary Instructions and Guidance with prescribed templates for completing,

reporting, and disclosing the stress test results; and

Whereas, each Federal Home Loan Bank timely filed its report of stress test results on or before April 30, 2015, as required by 12 CFR 1238.5; and

Whereas, after analyzing the results of each Federal Home Loan Bank's stress testing and the methodologies and practices used therein, FHFA has determined that the original template designed for public disclosure of the summary of each Bank's severely adverse scenario results that accompanied the Orders of December 1, 2014, should be revised; and

Whereas, section 1314 of the Federal Housing Enterprises Financial Safety and Soundness Act, as amended, 12 U.S.C. 4514(a), authorizes the Director of FHFA to require regulated entities, by general or specific order, to submit such reports on their management, activities, and operations as the Director considers appropriate.

Now therefore, it is hereby Ordered as follows:

Each Federal Home Loan Bank shall publicly disclose and report, as required by 12 CFR part 1238, a summary of the severely adverse scenario results of its stress testing using the template provided herewith as the attachment entitled "FHLBank Dodd-Frank Stress Test Template—SEVERLY ADVERSE (Disclosure to the Public)."

It is so ordered, this 10th day of June 2015.

This Order is effective immediately.

Signed at Washington, DC, this 10th day of June, 2015.

Melvin L. Watt,
Director, Federal Housing Finance Agency.

Dated: June 10, 2015.

RIN 2120-AA64

Airworthiness Directives; Pratt & Whitney Division Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: We are adopting a new airworthiness directive (AD) for all Pratt & Whitney Division (PW) PW6122A and PW6124A turbofan engines. This AD requires initial and repetitive borescope inspections (BSIs) of the high-pressure compressor (HPC) 7th stage integrally bladed (IB) rotor aft integral arm for cracks until replacement of the HPC 7th stage IB rotor using non-silver-plated nuts. This AD was prompted by reports of crack finds in the HPC 7th stage IB rotor. We are issuing this AD to prevent HPC 7th stage IB rotor fractures, which could lead to uncontained engine failure and damage to the airplane.

DATES: This AD is effective July 6, 2015.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of July 6, 2015.

We must receive comments on this AD by August 3, 2015.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

SUPPLEMENTARY INFORMATION:

Discussion

We received reports of cracks in the PW6122A and the PW6124A HPC 7th stage IB rotor aft integral arm. The root cause is the presence of silver-plated nuts reacting with hot titanium in a high sulfur/high chlorine environment. This AD requires initial and repetitive BSIs of the HPC 7th stage IB rotor. This AD also requires, as terminating action, replacement of the HPC 7th stage IB rotor and HPC 7th stage IB rotor silver-plated nuts with non-silver-plated nuts. This condition, if not corrected, could result in HPC 7th stage IB rotor fractures. We are issuing this AD to prevent HPC 7th stage IB rotor fractures, which could lead to uncontained engine failure and damage to the airplane.

Related Service Information Under 14 CFR Part 51

We reviewed PW Engineering Authorization (EA) No. 15MM008, Revision A, dated March 24, 2015. We also reviewed PW Service Bulletin (SB) No. PW6ENG 72-46, dated March 5, 2015. The EA describes procedures for BSIs of the HPC 7th stage IB rotor aft integral arm for cracks using the split-case method. The SB describes removal and replacement of the HPC 7th stage IB

rotor, removal of the HPC 7th stage IB rotor silver-plated nuts, and the installation of non-silver plated nuts. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of this AD.

FAA's Determination

We are issuing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

AD Requirements

This AD requires initial and repetitive BSIs of the HPC 7th stage IB rotor. This AD also requires as terminating action to replace the HPC 7th stage IB rotor and HPC 7th stage IB rotor silver-plated nuts with non-silver-plated nuts.

FAA's Justification and Determination of the Effective Date

No domestic operators use this product. Therefore, we find that notice and opportunity for prior public comment are unnecessary and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

This AD is a final rule that involves requirements affecting flight safety and was not preceded by notice and an opportunity for public comment. However, we invite you to send any written data, views, or arguments about this AD. Send your comments to an address listed under the **ADDRESSES** section. Include "Docket No. FAA-2015-0266; Directorate Identifier 2015-NE-03-AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this AD. We will consider all comments received by the closing date and may amend this AD because of those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this AD.

Costs of Compliance

We estimate that this AD will affect 0 engines installed on airplanes of U.S. registry. We also estimate that it would take about 8 hours per engine to comply with this AD. The average labor rate is \$85 per hour. Based on these figures, we
