Background

On March 8, 2016, we published a notice (81 FR 12380) announcing proposed revisions to our Mitigation Policy (January 23, 1981; 46 FR 7644– 7663). The revisions were motivated by changes in conservation challenges and practices since 1981, including accelerating loss of habitats, effects of climate change, and advances in conservation science. The revised policy provides a framework for applying a landscape-scale approach to achieve, through application of the mitigation hierarchy, a net gain in conservation outcomes, or at a minimum, no net loss of resources and their values, services, and functions resulting from proposed actions. The primary intent of the policy is to apply mitigation in a strategic manner that ensures an effective linkage with conservation strategies at appropriate landscape scales.

The revised policy integrates all authorities that allow the Service to recommend or require mitigation of impacts to federal trust fish and wildlife resources, and other resources identified in statute, during development processes. It is intended to serve as a single umbrella policy under which the Service may issue more detailed policies or guidance documents covering specific activities in the future.

Our March 8, 2016, notice stated that we would accept comments on the proposed revisions to our Mitigation Policy for 60 days, ending May 9, 2016. During the course of the comment period on the notice, we received requests to extend the public comment period. In order to provide all interested parties an opportunity to review and comment on the proposed revisions, we are reopening the comment period on the proposed revisions until the date specified in **DATES**.

The multiple authorities for this action include the: Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*); Fish and Wildlife Coordination Act, as amended, (16 U.S.C. 661– 667(e)); National Environmental Policy Act (42 U.S.C. 4321 *et seq.*); and others identified in section 2 and Appendix A of the proposed policy (81 FR 12380).
