

and submission for each suffix does not provide a basis by which the estimate was calculated or whether it is broadly applicable. We find this figure rather high and retain our original estimate of 6 hours. The latter figure is based on our familiarity with the average amount of time required by similar submissions to

FDA. At the same time, the comment also suggested that we failed to adequately account for the time spent on creating proposed suffixes. In consideration, therefore, we have revised our estimate upward to account for burden associated with creating and

submitting up to 10 proposed suffixes for designation, as reflected in table 1.

FDA estimates the information collection burden as follows:

Description of Respondents:

Respondents to the collection are sponsors of biological product applications.

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN ¹

Activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Information for the Proposed Proper Name for Biological Products Submitted Under Section 351(a) of the PHS Act	20	2	40	420	16,800
Information for the Proposed Proper Name for Biosimilar Products and Interchangeable Products Submitted Under Section 351(k) of the PHS Act	3	2	6	420	2,520
Total	19,320

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

The guidance also refers to previously approved collections of information found in FDA regulations. The collections of information for the submission of a biologics license application (BLA) and changes (supplements) to an approved application under 21 CFR part 601 have been approved under OMB control number 0910–0338. The collections of information for the submission of a BLA under section 351(k) of the PHS Act (biosimilar products and interchangeable products) have been approved under OMB control number 0910–0719.
