Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: This ICR seeks approval under the PRA for revisions to the National Longitudinal Survey of Youth 1979 (NLSY79). The NLSY79 is a representative national sample of persons who were born in the years 1957 to 1964 and lived in the U.S. in 1978. These respondents were ages 14 to 22 when the first round of interviews began in 1979; they will be ages 51 to 58 when the planned round twenty-seven of interviews is conducted in 2016 and 2017. The NLSY79 was conducted annually from 1979 to 1994 and has been conducted biennially since 1994. The longitudinal focus of this survey requires information to be collected from the same individuals over many years in order to trace their education, training, work experience, fertility, income, and program participation. In addition to the main NLSY79, the biological children of female NLSY79 respondents have been surveyed since 1986. A battery of child cognitive, socio-emotional, and physiological assessments has been administered biennially since 1986 to NLSY79 mothers and their children. Starting in 1994, children who had reached age 15 by December 31, of the survey year (the Young Adults) were interviewed about their work experiences, training, schooling, health, fertility, self-esteem, and other topics. By 2016, the sample includes very few children age 14 and under and so we will no longer conduct a separate child survey; children age 12 and older will join the Young Adults. The Young Adult group will include 1,492 respondents ages 12–22 and 5,178 respondents age 23 and older in Round

27. One DOL goal is to produce and disseminate timely, accurate, and relevant information about the U.S. labor force. The BLS contributes to this goal by gathering information about the labor force and labor market and disseminating it to policymakers and the public so that participants in those markets can make more informed, and thus more efficient, choices. Research based on the NLSY79 contributes to the formation of national policy in the areas of education, training, employment programs, and school-to-work transitions. The BLS has undertaken a continuing redesign effort to examine the current content of the NLSY79 and provide direction for changes that may be appropriate as the respondents age. The 2016 instrument reflects a number of changes recommended by experts in various fields of social science and by our own internal review of the survey's content. Additions to the questionnaire are accompanied by deletions of previous questions that largely offset the burden as compared to 2014. The BLS Authorizing Statute authorizes this information collection. See 29 U.S.C. 1 and 2.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1220–0109. The current approval is scheduled to expire on September 30, 2016; however, the DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. New requirements would only take effect upon OMB approval. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on March 29, 2016 (81 FR 17496).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number

1220–0109. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.
