

territories, as well as interferometric synthetic aperture radar (ifsar) data over Alaska. The 3DEP initiative is based on the results of the National Enhanced Elevation Assessment (NEEA), which indicated an optimal benefit to cost ratio for Quality Level 2 (QL2) data collected over 8-years to complete national coverage. The implementation model for 3DEP is based on multi-agency partnership funding for acquisition, with the USGS acting in a lead program management role to facilitate planning and acquisition for the broader community, through the use of government contracts and partnership agreements. The annual Broad Agency Announcement (BAA) is a competitive solicitation issued to facilitate the collection of lidar and derived elevation data for the 3D Elevation Program (3DEP). Federal agencies, state and local governments, tribes, academic institutions and the private sector are eligible to submit proposals. The 3DEP public webinars will introduce this opportunity to the broadest stakeholder community possible and provide a summary of the BAA application procedures. Advanced Registration is required. National Webinars will be recorded and made available for viewing.

SUPPLEMENTARY INFORMATION:

I. Abstract

This information collection is authorized under 25 CFR 161, which implements the Navajo-Hopi Indian Relocation Amendments Act of 1980, 94 Stat. 929, codified as 25 U.S.C. 640d–

640d–31, and the Federal court decisions of *Healing v. Jones*, 174 F. Supp.211 (D. Ariz. 1959) (*Healing I*), *Healing v. Jones*, 210 F. Supp. 126 (D. Ariz. 1962), aff’d 363 U.S. 758 (1963) (*Healing II*), *Hopi Tribe v. Watt*, 530 F. Supp. 1217 (D. Ariz. 1982), and *Hopi Tribe v. Watt*, 719 F.2d 314 (9th Cir. 1983). Another law and ruling affecting grazing include Public Law 103–177, the American Indian Agricultural Resource Management Act, as amended and codified as 25 U.S.C. 3701 *et seq.*, authorizes the Secretary of the Interior, in participating with the beneficial owner of the land, to manage Indian agricultural lands in a manner consistent with trust responsibilities and with identified Tribal goals and priorities for conservation, multiple use, and sustained yield.

This information collection allows BIA to receive the information necessary to determine whether an applicant to obtain, modify, or assign a grazing permit on Navajo Partitioned Lands is eligible and complies with all applicable grazing permit requirements. BIA, in coordination with the Navajo Nation, will continue to collect grazing permit information up to and beyond the initial reissuing of the grazing permits, likely within a 1–3 year time period from the date of publication of this notice. The data is maintained by BIA’s Navajo Partitioned Land office. The burden hours for this continued collection of information are reflected in the Estimated Total Annual Hour Burden in this notice.

II. Request for Comments

Please note that an agency may not conduct or sponsor and an individual need not respond to, a collection of information unless it displays a valid OMB Control Number.

It is our policy to make all comments available to the public for review at the location listed in the **ADDRESSES** section. Before including your address, phone number, email address or other personal identifying information in your

comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. SUPPLEMENTARY INFORMATION: The MLP/Proposed RMP Amendments/Final EIS would change the management direction for the leasing of oil, gas and potash in portions of the Moab and Monticello plan areas. The MLP planning area encompasses 785,000 acres of public lands in southeast Utah in Grand and San Juan Counties. The planning area is located south of Interstate 70 and adjoins the town of Moab and Arches National Park. The western boundary is the Green River and the northeastern boundary of Canyonlands National Park. To the south of Moab, the planning area includes the Indian Creek/Lockhart Basin/Hatch Point area between Canyonlands National Park and Highway 191. Land uses and values within the planning area include substantial potash resources, proven oil and gas resources, world class scenery, and both developed and back-country recreational opportunities. In addition, the planning area is immediately adjacent to Arches and Canyonlands National Parks. This unique combination of values means the planning area contributes to the local economy both through tourism and mineral extraction.

The BLM has prepared a MLP/Proposed RMP Amendments/Final EIS in accordance with the BLM Washington Office Instruction Memorandum (IM No. 2010–117: Oil and Gas Leasing Reform—Land Use Planning and Lease Parcel Reviews (May 17, 2010)) and the BLM Handbook H–1624–1: Planning for Fluid Mineral Resources, Chapter V, Master Leasing Plans (January 28, 2013). As the Handbook explains, an MLP is a plan that includes analysis of a distinct geographic area that takes a closely-focused look at RMP decisions pertaining to leasing and post-leasing development of the area. Although the IM and the Handbook pertain to oil and gas leasing decisions, the BLM determined that the MLP concepts are also applicable to potash leasing decisions due to the nature of potash exploration and development in the planning area. Therefore, the MLP process provides additional planning and analysis for areas prior to new leasing of oil and gas and potash. The MLP/Proposed RMP Amendments/Final EIS analyzes likely mineral development scenarios and land use plan alternatives with varying mitigation levels for leasing.

The MLP/Proposed RMP Amendments/Final EIS includes a range
