#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

This request is for an extension of a current information collection.

NOAA has established requirements for the licensing of private operators of remote-sensing space systems. The information in applications and subsequent reports is needed to ensure compliance with the Land Remote-Sensing Policy Act of 1992 and with the national security and international obligations of the United States. The requirements are contained in 15 CFR part 960.

##### II. Method of Collection

Information is submitted via email.

##### III. Data

*OMB Control Number:* 0648-0174.

*Form Number:* None.

*Type of Review:* Regular submission (extension of a current information collection).

*Affected Public:* Business or other for-profit organizations.

*Estimated Number of Respondents:* 18.

*Estimated Time per Response:* 40 hours for the submission of a license application; 10 hours for the submission of a data protection plan; 5 hours for the submission of a plan describing how the licensee will comply with data collection restrictions; 3 hours for the submission of an operations plan for restricting collection or dissemination of imagery of Israeli territory; 3 hours for submission of a data flow diagram; 2 hours for the submission of satellite sub-systems drawings; 3 hours for the submission of a final imaging system specifications document; 2 hours for the submission of a public summary for a licensed system; 2 hours for the submission of a preliminary design review; 2 hours for the submission of a critical design review; 1 hour for notification of a binding launch services contract; 1 hour for notification of completion of pre-ship review; 10 hours for the submission of a license amendment; 2 hours for the submission of a foreign agreement notification; 2 hours for the submission of spacecraft operational information submitted when a spacecraft becomes operational; 2 hours for notification of deviation in orbit or spacecraft disposition; 2 hours for notification of any operational deviation; 2 hours for notification of planned purges of information to the National Satellite Land Remote Sensing Data Archive; 3 hours for the submission of an operational quarterly

report; 8 hours for an annual compliance audit; 10 hours for an annual operational audit; and 2 hours for notification of the demise of a system or a decision to discontinue system operations.

*Estimated Total Annual Burden Hours:* 552.

*Estimated Total Annual Cost to Public:* \$1,000 in recordkeeping/reporting costs.

##### IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: August 17, 2016.

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The patent term restoration portion of the Drug Price Competition and Patent Term Restoration Act of 1984 (P.L. 98-417), which is codified at 35 U.S.C. 156, permits the United States Patent and Trademark Office (USPTO) to extend the term of protection under a patent to compensate for delay during regulatory review and approval by the Food and Drug Administration (FDA) or Department of Agriculture. Only patents for drug products, medical devices, food additives, or color additives are potentially eligible for extension. The maximum length that a patent may be extended under 35 U.S.C. 156 is five years.

Under 35 U.S.C. 156(d), an application for patent term extension must identify the approved product; the patent to be extended; and the claims included in the patent that cover the approved product, a method of using the approved product, or a method of manufacturing the approved product. 35 U.S.C. 156(d) also requires the application for patent term extension to provide a brief description of the activities undertaken by the applicant during the regulatory review period with respect to the approved product and the significant dates of these activities.

Under 35 U.S.C. 156(e), an interim extension may be granted if the term of an eligible patent for which an application for patent term extension has been submitted would expire before a certificate of extension is issued. Under 35 U.S.C. 156(d)(5), an interim extension may be granted if the applicable regulatory review period that began for a product is reasonably expected to extend beyond the expiration of the patent term in effect.

The USPTO administers 35 U.S.C. 156 through 37 CFR 1.710-1.791. These rules provide for the public to, inter alia, submit 35 U.S.C. 156 patent term extension applications to the USPTO, request interim extensions and review of final eligibility decisions, and withdraw an application requesting a patent term extension after it is submitted.

Separate from the extension provisions of 35 U.S.C. 156, the USPTO may in some cases extend the term of an original patent due to certain delays in

the prosecution of the patent application, including delays caused by interference proceedings, secrecy orders, or appellate review by the Patent Trial and Appeal Board or a Federal court in which the patent is issued pursuant to a decision reversing an adverse determination of patentability. The patent term provisions of 35 U.S.C. 154(b), as amended by title IV, subtitle D of the Intellectual Property and Communications Omnibus Reform Act of 1999, require the USPTO to notify the applicant of the patent term adjustment in the notice of allowance and give the applicant an opportunity to request reconsideration of the USPTO's patent term adjustment determination.

The USPTO may also reduce the amount of patent term adjustment granted if delays were caused by an applicant's failure to make a reasonable effort to respond within three months of the mailing date of a communication from the USPTO. Applicants may petition for reinstatement of a reduction in patent term adjustment with a showing that, in spite of all due care, the applicant was unable to respond to a communication from the USPTO within the three-month period. The USPTO administers 35 U.S.C. 154 through 37 CFR 1.701-1.705.

The information in this collection is used by the USPTO to consider whether an applicant is eligible for a patent term extension or reconsideration of a patent term adjustment and, if so, to determine the length of the patent term extension or adjustment.

##### II. Method of Collection

By mail, facsimile, hand delivery, or electronically to the USPTO.

##### III. Data

*OMB Number:* 0651-0020.

*IC Instruments and Forms:* There are no forms associated with this collection.

*Type of Review:* Revision of a Previously Existing Information Collection.

*Affected Public:* Businesses or other for-profits; not-for-profit institutions.

*Estimated Number of Respondents:* 1,340 responses per year. The USPTO estimates that approximately 25% of these responses will be from small entities.

*Estimated Time per Response:* The USPTO estimates that it will take the public from 1 to 25 hours, depending on the complexity of the situation, to gather the necessary information, prepare the appropriate documents, and submit the information to the USPTO.

*Estimated Total Annual Respondent Burden Hours:* 6,187 hours.
