SUPPLEMENTARY INFORMATION:

Agenda

In the November 2015, the New Jersey Department of Environmental Protection (DEP) petitioned the Mid-Atlantic Council to designate 13 artificial reef sites as SMZ's in the EEZ under provisions of Amendment 9 to the

Summer Flounder, Scup and Black Sea Bass Fishery Management Plan. The justification for this request was based on the need to ameliorate gear conflicts between hook and line fishermen and fixed pot/trap gear at those sites. The Council received a report from the SMZ Monitoring Team (MT) at its October 2016 meeting which evaluated the NJDEP request relative to the following factors: (1) Fairness and equity; (2) promotion of conservation; (3) avoidance of excessive shares; (4) consistency with the objectives of Amendment 9, the Magnuson-Stevens Act, and other applicable law; (5) the natural bottom in and surrounding potential SMZs; and (6) impacts on historical uses. The MT's analysis concluded that the designation of the NJDEP 13 reef sites appears to be compatible with the Magnuson-Stevens Act and other applicable federal law. Based on evaluation of all relevant factors and issues as outlined in Amendment 9, the SMZ Monitoring Team recommended that the Council designate all 13 New Jersey's artificial reefs located in the EEZ as SMZs. The SMZ designation could stipulate that no fishing vessel or person on a fishing vessel may fish in the 13 New Jersey Special Management Zones with any gear except hook and line and spear fishing (including the taking of fish by hand). The MT analysis indicated that commercial fishing vessels deploying pot/trap gear off the coast of New Jersey would likely face minimal to no losses in ex-vessel revenue if the artificial reefs are designated as SMZs. The Council discussed the MT's recommendations and decided to hold public hearings in November 2016 in NJ and NY to solicit public comments on the NJ SMZ request. The Council is seeking public comment on NJ's SMZ request and is scheduled to make a decision relative to NJ's request at its December 2016 meeting in Annapolis, MD.

SUPPLEMENTARY INFORMATION: The Council selected preferred locations for designation as Spawning Special Management Zones (SMZs) in Amendment 36 to the Snapper Grouper Fishery Management Plan in 2016. Amendment 36, which is under Secretarial review, includes an action to prohibit harvest or possession of species managed under the Council's snapper grouper fishery management unit in the designated Spawning SMZs because of the area's potential to be spawning areas for multiple species. The Council is holding a meeting to coordinate research for the proposed Devil's Hole Spawning SMZ, one of the proposed Spawning SMZs off the coast of South Carolina. The Devil's Hole Research Planning Group is meeting to discuss past research in the proposed Spawning SMZ and discuss and coordinate future sampling events in the area. The group is comprised of research scientists, state and federal agency representatives, commercial fishermen, recreational

fishermen, and non-governmental organization representatives.
