DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Vessel Monitoring System Requirements under the Western and Central Pacific Fisheries Convention.

OMB Control Number: 0648-0596.

Form Number(s): None.

Type of Request: Regular (extension of a currently approved information collection).

Number of Respondents: 23.

Average Hours per Response: VMS unit purchase and installation, 1 hr; activation reports, 5 min; on/off reports, 5 min; VMS unit maintenance, 1 hr.

Burden Hours: 57.

Needs and Uses: This request is for an extension of a currently approved information collection. National Marine Fisheries Service (NMFS) has issued regulations under authority of the Western and Central Pacific Fisheries Convention Implementation Act (WCPFCIA; 16 U.S.C. 6901 *et seq.*) to carry out the obligations of the United States under the Convention on the Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific Ocean (Convention), including implementing the decisions of the Commission for the Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific Ocean (Commission). The regulations include a requirement for the owners and operators of U.S. vessels that fish for highly migratory species on the high seas in the Convention Area to carry and operate near real-time satellite-based position-fixing transmitters ("VMS units") at all times except when the vessel is in port. As part of this requirement, vessel owners and operators must transmit: (1) "on/off reports" to NMFS whenever the VMS unit is turned off while the vessel is in port, (2) "activation reports" to NMFS prior to the first use of a VMS unit, and (3) automatic "position reports" from the VMS unit to NOAA and the Commission as part of a vessel monitoring system (VMS) operated by the Commission (50 CFR 300.45). Under this information collection, it is expected that vessel owners and operators would also need to purchase, install, and occasionally maintain the VMS units.

The information collected from the vessel position reports is used by NOAA and the Commission to help ensure compliance with domestic laws and the Commission's conservation and management measures, and are necessary in order to the United States to satisfy its obligations under the Convention.

Affected Public: Business or other for-profit organizations.

Frequency: Annually and on occasion.

Respondent's Obligation: Mandatory.

This information collection request may be viewed at reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to OIRA_Submission@omb.eop.gov or fax to (202) 395-5806.

Dated: January 5, 2016.

Sarah Brabson,

NOAA PRA Clearance Officer.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for reinstatement with change of a currently approved information collection.

The National Marine Sanctuaries Act (16 U.S.C. 1431, *et seq.*) authorizes the use of research and monitoring within National Marine Sanctuaries (NMS). In 1996, the Flower Gardens Bank National Marine Sanctuary (FGBNMS) was added to the system of NMS via 15 CFR part 922, subpart L. In 2001, Stetson Bank was added in a revision of 15 CFR part 922.

The National Marine Sanctuaries Act (NMSA) specifies that each NMS should revise their management plans on a five-year cycle. The FGBNMS has begun the management plan review process. The NMSA also allows for the creation of Sanctuary Advisory Councils (SACs). SACs are comprised of representatives of all NMS stakeholders. Management Plan Review (MPR) is a public process and the SACs, along with a series of public meetings, are used to help scope out issues in revising the management plans and regulations. SAC Working Groups are often used to evaluate management or regulatory alternatives. In the current MPR for the FGBNMS, two major issues have emerged: Boundary expansion and research-only areas. In addition, several new or modified regulations are being considered to meet specific needs for diver safety and resource protection (no anchoring/mooring buoy use requirement and a more stringent pollution discharge regulation).

To address each one these issues, a socioeconomic panel composed of NOAA staff and social scientists from other agencies, or from universities, developed information and tools to assess the socioeconomic impacts of management strategies and regulatory alternatives. The information and tools developed in this process will also provide the necessary information for meeting agency requirements for socioeconomic impact analyses under the National Environmental Policy Act (NEPA), Executive Order 12086 (Regulatory Impact Review) and an Initial and Final Regulatory Flexibility Analyses (impacts on small businesses). Our initial plan, as the first step in the assessment process, was to interview three key sanctuary user groups—commercial fishers, for-hire recreational dive operations and for-hire recreational fishing operations (charter and party/head boat operations)—with questions focusing on: (1) General information, economic information and trip costs and (2) knowledge, attitudes and

perceptions of sanctuary management strategies and regulations.

In 2011–2012, the for-hire dive and fishing industry interviews were completed. The commercial fisheries interviews were completed in 2013.

The FGBNMS management and SAC now want to evaluate moving the scope of boundary expansion eastward; this will require us to gather the same information for the three user groups in areas east of the original data collection.

II. Method of Collection

Interviews will be conducted face-to-face and recorded on paper forms.

III. Data

OMB Control Number: 0648–0597.
