

for many fishermen to afford. There are also questions about the accurate representation of the information, since there is evidence that fishing behavior may be different on observed and unobserved trips. For these reasons, the Council may explore alternatives to at-sea observers, such as using cameras to monitor fishing activity, which is usually referred to as Electronic Monitoring, or EM. The Council also may consider changes to the way landings information is provided by both dealers and vessel operators and how it is assigned to stock areas. When developing this amendment, the Council will take into account other regional projects to improve catch monitoring, such as the Fishery Dependent Data Visioning project that NMFS is pursuing. In summary, the Council may consider changes to any part of the system used to collect and

report commercial catch information in the Northeast multispecies fishery.

At its September 2016 meeting, the Council identified that the purpose of this amendment will be to adjust the groundfish monitoring program to improve reliability and accountability. The Council's Groundfish Oversight Committee and the Council will identify the goal and objectives of the amendment following the scoping period and will then develop alternatives to achieve the goal and objectives. Following input from the Committee and the public, the Council will select a range of alternatives to improve the monitoring and reporting system.

Public Comment

All persons affected by or otherwise interested in Northeast multispecies management are invited to participate in commenting on the scope and

significance of issues to be analyzed by submitting written comments (see **ADDRESSES**) or by attending one of the six scoping meetings, including one webinar, for this amendment. Scoping consists of identifying the range of actions, alternatives, and possible impacts to be considered. At this time, the Council believes that it may consider changing any aspect of the existing groundfish monitoring and reporting system. After the scoping process is completed, the Council will begin development of Amendment 23 and will prepare an EIS to analyze the impacts of the range of alternatives for changing the monitoring and reporting system. The Council will hold public hearings to receive comments on the draft amendment and on the analysis of its impacts presented in the Draft EIS.

The Council will take and discuss scoping comments on this amendment at the following public meetings:
