

Agency (SWA) or through willful misrepresentation or error by the claimant or others; (2) deter claimants from obtaining benefits through willful misrepresentation; and (3) recover benefits overpaid. The ETA 227 is used to determine whether SWAs meet these requirements.

The ETA 227 contains data on the number and amounts of fraud and non-fraud overpayments established, the methods by which overpayments were detected, the amounts and methods by which overpayments were collected, the amounts of overpayments waived and written off, the accounts receivable for overpayments outstanding, and data on criminal/civil actions. These data are gathered by 53 SWAs and reported to the Department of Labor following the end of each calendar quarter. The overall effectiveness of SWAs' UI integrity efforts can be determined by examining and analyzing the data. These data are also used by SWAs as a management tool for effective UI program administration.

This information collection is subject to the PRA. SUPPLEMENTARY INFORMATION: The DOL, as part of continuing efforts to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies an opportunity to comment on proposed and/or continuing collections of information before submitting them to the Office of Management and Budget (OMB) for final approval. This program helps to ensure requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements can be properly assessed.

Under the Government Performance and Results Act of 1993 (GPRA), the Department's Strategic Plan is an integral part of the budget process. Among the purposes of the GPRA are to improve Federal program effectiveness and public accountability by focusing on program results, service quality, and customer satisfaction.

Strategic Objective 4.1 in the Department's fiscal year (FY) 2014-2018 Strategic Plan is to provide income support when work is impossible or unavailable and facilitate return to work, which focuses on improving the operational performance and effectiveness of the Federal/state UI program. This goal is supported in part by the performance measure indicating the percentage of UI claimants reemployed by the end of the first quarter after the quarter in which they received their initial first UI benefit payment. ETA collects the data to measure the facilitation of

reemployment of UI benefit recipients through the ETA 9047 report. OMB approved the Department's request to begin collecting UI reemployment data through the ETA 9047 report on July 26, 2005. This data collection was renewed in 2014 through September 30, 2017.

ETA has also included UI reemployment as a performance measure for UI Performs, the Department's performance management system for the UI program. Per UI Program Letter (UIPL) No. 17-08 (May 14, 2008), Acceptable Levels of Performance (ALP), the minimum performance criteria for UI Performs Core Measures are set annually for each state. The ALPs take into account a state's total unemployment rate and the percentage of UI claimants who are exempt from active work search or Employment Service (ES) registration requirements because they are job-attached. Analyses of the data indicate that UI reemployment is strongly related to these two factors.

Each calendar quarter, states report on the ETA 9047 report separate counts for individuals receiving their first UI payments who are exempt from active work search or ES registration requirements, in most cases because they are job-attached with definite recall dates, and those not exempt from active work search or ES registration requirements.

States also report on the ETA 9047 report the number of those first payment recipients for whom intrastate or out-of-state employers reported wages in the subsequent quarter. States obtain these counts by crossmatching the Social Security Numbers (SSNs) of claimants who received UI first payments with the UI wage records for the subsequent calendar quarter. ETA issued instructions on obtaining out-of-state reemployment data through matching the SSNs of UI first payment recipients with UI wage records in the National Directory of New Hires in UIPL No. 1-06, Change 1 (August 2, 2006).
