Information Collection Request Title: National Council for Behavioral Health's Information Technology Survey.

Abstract: The Office of the National Coordinator for Health IT (ONC) in coordination with Substance Abuse and Mental Health Services Administration (SAMHSA) seeks to conduct a survey in 2017 of SAMSHA to examine the adoption and use of health IT as well as interoperability across community behavioral health care settings. Data from the survey will help ONC and SAMSHA monitor progress and enhance programs and policy to improve the use of health IT and expand interoperability across these settings. In 2015, ONC outlined a strategy by which both private and public stakeholders would work together to improve

interoperability. This strategy called for measuring and reporting on the state of interoperability across the care continuum, including for behavioral health care providers; however, there are no recent national data available for this care setting. Addressing this gap is critical in order to also determine these providers' readiness to serve as partners in delivery system reform efforts that are underway and that will be expanded with the implementation of Medicare Access and CHIP Reauthorization Act of 2015 (MACRA). Although behavioral health care providers won't be participating in the MACRA initiative at the outset, the Secretary of Health and Human Services may include behavioral health providers, such as psychologists and social workers to participate in value-based payment initiatives such as the Merit-Based Incentive Payment System (MIPs) in the future.

Need and Proposed Use of the Information: This data collection effort will allow for us to assess health IT adoption and interoperability progress since 2015, enable comparisons to physician and hospital settings and contribute to strategic efforts to improve behavioral healthcare providers' adoption and use of health IT.

Likely Respondents: The respondents will include mid-level and executive level staff (IT Directors, CIO, and CEOs) of behavioral healthcare organizations that are involved in the management and maintenance of their organization's health IT infrastructure.

The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS

Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
National Council for Behavioral Health's Information Technology Survey	533	1	20/60	178

Information Collection Request Title: Federal Evaluation of Making Proud Choices! (MPC!)

OMB No.: 0990-0452

Abstract: The Office of Adolescent Health (OAH), U.S. Department of Health and Human Services (HHS) is requesting approval by OMB on a revised data collection. The Federal Evaluation of Making Proud Choices! (MPC!) will provide information about program design, implementation, and impacts through a rigorous assessment of a highly popular teen pregnancy prevention curriculum—MPC. This revision to this information collection request includes the follow-up survey instrument, administered approximately 9 and 15 months post baseline, and related to the impact study. The evaluation will be conducted in 39 schools nationwide. The data collected from this instrument will provide a detailed understanding of program impacts. Clearance is requested for three years.

Need and Proposed Use of the Information: The follow-up survey data

will be used to determine program effectiveness by comparing sexual behavior outcomes, such as postponing sexual activity, and reducing or preventing sexual risk behaviors and STDs and intermediate outcomes, such as improving exposure, knowledge and attitudes between treatment (program) and control youth.

The findings from these analyses of program impacts will be of interest to the general public, to policymakers, and to schools and other organizations interested in supporting teen pregnancy prevention.

Likely Respondents: The follow-up surveys will be administered to study participants, who will primarily be in 10th–12th grade at the time of the follow-up surveys.

The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS

Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours

Follow up survey (15 months post baseline)	774	1	30/60	387
Total	1593	796.5
