

10. *Abstract:* Part 61 of title 10 of the *Code of Federal Regulations* (10 CFR), establishes the procedures, criteria, and license terms and conditions for the land disposal of low-level radioactive waste. The reporting and recordkeeping requirements are mandatory and, in the case of application submittals, are required to obtain a benefit. The information collected in the applications, reports, and records is evaluated by the NRC to ensure that the licensee's or applicant's disposal facility, equipment, organization, training, experience, procedures, and plans provide an adequate level of protection of public health and safety, common defense and security, and the environment.

III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the estimate of the burden of the information collection accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Dated at Rockville, Maryland, this 4th day of May, 2017.

Pursuant to its authority under section 5051 of Public Law 100-203, Nuclear Waste Policy Amendments Act (NWPAA) of 1987, the U.S. Nuclear Waste Technical Review Board will hold an open public meeting in Richland, Washington, on Wednesday, June 21, 2017, to review information on recent U.S. Department of Energy (DOE) research activities related to corrosion and long-term performance of borosilicate high-level radioactive waste (HLW) glass.

The Nuclear Waste Policy Amendments Act (NWPAA) of 1987 charges the Board with performing an ongoing and independent evaluation of the technical and scientific validity of DOE activities related to the disposition of spent nuclear fuel (SNF) and HLW.

The Board meeting will be held at the Courtyard Richland Columbia Point, 480 Columbia Point Drive, Richland, WA 99352; Tel 509-942-9400. A block of rooms has been reserved for meeting attendees at a rate of \$96.00 per night. Reservations may be made by phone (1-888-236-2427, refer to group code NUCG) or online ([http://www.marriott.com/NWTRB meeting](http://www.marriott.com/NWTRB%20meeting)). The meeting will begin at 8:00 a.m. on Wednesday, June 21, 2017, and is scheduled to adjourn at 5:20 p.m. Speakers from U.S. national laboratories will present DOE-funded work during Fiscal Years 2015 to 2017 on HLW glass corrosion and long-term performance. Experts from other countries will provide their perspectives on the current understanding and remaining challenges in measuring and modeling glass performance. Immediately after the meeting, there will be a poster session during which scientists and engineers from universities and national

laboratories will present their research related to waste glass corrosion.

A detailed meeting agenda will be available on the Board's Web site at www.nwtrb.gov approximately one week before the meeting. The agenda may also be requested by email or telephone at that time from Davonya Barnes of the Board's staff.

The meeting will be open to the public, and opportunities for public comment will be provided before the lunch break and at the end of the day. The transcript of the meeting will be available on the Board's Web site no later than July 20, 2017.

The Board was established in the NWPAA as an independent federal agency in the Executive Branch to evaluate the technical and scientific validity of DOE activities related to the management and disposal of SNF and HLW and to provide objective expert advice to Congress and the Secretary of Energy on these issues. Board members are experts in their fields and are appointed to the Board by the President from a list of candidates submitted by the National Academy of Sciences.
