SUPPLEMENTARY INFORMATION:

I. Background

In accordance with § 51.118 of title 10 of the *Code of Federal Regulations*, the NRC is making available the final EIS for the Construction Permit Application for the NWMI facility. The draft EIS was noticed by the NRC in the **Federal Register** on November 9, 2016 (81 FR 78865), and noticed by the Environmental Protection Agency on November 10, 2016 (81 FR 79019). The public comment period on the draft EIS ended on December 29, 2016, and the comments received are addressed in the final EIS. The final EIS is available as indicated in the **ADDRESSES** section of this document.

II. Discussion

As discussed in Chapter 6 of the final EIS, the NRC determined that after weighing the environmental, economic, technical, and other benefits against environmental and other costs, and considering reasonable alternatives, the NRC staff recommends the issuance of the construction permit to NWMI, unless safety issues mandate otherwise. This recommendation is based on (1) NWMI's Environmental Report, (2) the NRC's consultation with Federal, State, and local agencies, (3) the NRC's independent environmental review; and (4) the NRC's consideration of public comments.

Dated at Rockville, Maryland, this 11th day of May 2017.

For the Nuclear Regulatory Commission.

Jeffery J. Rikhoff,

Acting Chief, Environmental Review and Project Management Branch, Division of License Renewal, Office of Nuclear Reactor Regulation.

SUPPLEMENTARY INFORMATION:

I. Background

The HBPP-3 facility is a decommissioning power reactor located in Humboldt County, California. The PG&E is the holder of HBPP-3 Facility Operating License No. DPR-7. On July 2, 1976, HBPP-3 was shut down for annual refueling and to conduct seismic modifications. In 1983, updated economic analyses indicated that restarting HBPP-3 probably would not be cost-effective, and on June 27, 1983, PG&E announced its intention to decommission the unit. In 1984, PG&E submitted the HBPP-3 SAFSTOR¹ Decommissioning Plan in support of the application to amend the HBPP-3 operating license to a possession-only license. On July 16, 1985, the NRC issued Amendment No. 19 to the HBPP Unit 3 Operating License (ADAMS Legacy No. 8507260040) to change the status to possess-but-not-operate, and the plant was placed into a SAFSTOR status. On December 11, 2008, PG&E completed the transfer of spent fuel from the HBPP-3 spent fuel pool (SFP) into the Humboldt Bay Independent Spent Fuel Storage Installation. PG&E then began decontamination and dismantlement of HBPP-3.

II. Request/Action

By letter dated March 9, 2017 (ADAMS Accession No. ML17068A095), PG&E filed a request for NRC approval of an exemption from the record retention requirements of: (1) Part 50 of title 10 of the *Code of Federal Regulations* (10 CFR), appendix B, Criterion XVII, which requires certain records be retained consistent with other regulatory requirements; (2) 10 CFR 50.59(d)(3), which requires certain records be maintained until termination of a license issued pursuant to 10 CFR part 50; and (3) 10 CFR 50.71(c), which requires certain records be maintained

¹ "SAFSTOR" is a method of decommissioning in which a nuclear facility is placed and maintained in a condition that allows the facility to be safely stored and subsequently decontaminated (deferred decontamination) to levels that permit release for unrestricted use.
