Michel Smyth by telephone at 202–693–4129, TTY 202–693–8064, (these are not toll-free numbers) or by email at DOL_PRA_PUBLIC@dol.gov.

Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Respirator Program Records information collection requirements contained in regulations 30 CFR 56.5005 and 57–5005, which provide that, generally, whenever respiratory equipment is used, the metal or nonmetal mine operator must institute a respirator program governing selection, maintenance, training, fitting, supervision, cleaning, and use of respirators. These regulations seek to control miner exposure to harmful airborne contaminants by using engineering controls to prevent contamination and to vent or to dilute any contaminated air. The regulations include information collections related to the development of a respirator program that addresses the selection, use, and care of respirators; fit-testing records used to ensure that a respirator worn by an individual is the same brand, model, and size respirator that was worn when that individual successfully passed a fit-test; and records kept of inspection dates and findings for respirators maintained for emergency use. The mine operator uses the information to issue proper respiratory protection to miners when feasible engineering and/or administrative controls do not reduce miners’ exposures to permissible levels.

The MSHA uses the information to determine compliance with the standard. Mine Safety and Health Act of 1977 section 103(h) authorizes this information collection. *See* 30 U.S.C. 813(h).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. *See* 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1219–0048.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on July 31, 2017. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on March 7, 2017 (43 FR 12855).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1219–0048. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the
