II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review titled "10 CFR part 52, Licenses, Certifications, and Approvals for Nuclear Power Plants." The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on April 4, 2017 (82 FR 16435).

1. *The title of the information collection:* 10 CFR part 52, Licenses, Certifications, and Approvals for Nuclear Power Plants.

2. *OMB approval number:* 3150-0151.

3. *Type of submission:* Extension.

4. *The form number if applicable:* Not applicable.

5. *How often the collection is required or requested:* On occasion. Applications are submitted only when licensing action is sought.

6. *Who will be required or asked to respond:* Applicants for early site permits (ESPs), standard design approvals (SDAs) and certifications, manufacturing licenses (MLs), and licenses which combine construction permits (CPs) and conditional operating licenses (OLs), e.g., COLs, for commercial nuclear power reactors.

7. *The estimated number of annual responses:* 1,175 (1,150 reporting responses plus 25 recordkeepers).

8. *The estimated number of annual respondents:* 25.

9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request:* 243,854 hours (220,414 hours reporting plus 23,440 hours recordkeeping).

10. *Abstract:* The licensing processes in part 52 of title 10 of the *Code of Federal Regulations* (10 CFR) provide for issuance of ESPs, SDAs, MLs, CPs, and COLs for commercial nuclear power reactors. The applicants submit updated reports, applications for renewals, exemption requests and maintain records of changes to the facility and records of detailed design related information. These licensing procedures

are options to the two-step licensing process in 10 CFR part 50, which provides for a CP and an OL. The part 52 licensing process places procedural requirements in part 52 and technical requirements in part 50. Part 52 reduces the overall paperwork burden borne by applicants for CPs and OLs because part 52 only requires a single application and provides options for referencing standardized designs. The information in 10 CFR part 52 is needed by the agency to assess the adequacy and suitability of an applicant's site, plant design, construction, training and experience, plans and procedures for the protection of public health and safety.

Dated at Rockville, Maryland, this 6th day of July 2017.

NRC Clearance Officer, Office of the Chief Information Officer.
