Policy Justification
Government of India—CBRN Support Equipment

The Government of India (GoI) has requested a possible sale of 38,034 M50 general purpose masks; Joint Service Lightweight Integrated Suit Technology (JSLIST), which consists of 38,034 each: suits, pairs of trousers, pairs of gloves, pairs of boots and NBC bags; 854 aprons; 854 alternative aprons; 9,509

Quick Doff Hoods; and 114,102 M61 filters. Also included in the potential sale is training; technical data; U.S. Government technical assistance; staging/consolidation; transportation; and other related elements of logistics support. The estimated cost is \$75 million.

This proposed sale will contribute to the foreign policy and national security of the United States, by helping to improve the security of a friendly country which has been, and continues to be, an important force for political stability and economic progress in South Asia.

The GoI intends to use these defense articles and services to modernize its armed forces. This will contribute to the Indian military's goal to update its capability while enhancing the relationship between India and the United States. The GoI will have no difficulty absorbing these defense articles into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor involved in this program is Avon Protection Systems, Inc., Cadillac, MI. At this time, there are no known offset agreements proposed in connection with this potential sale.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 17-08

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The Joint Service Lightweight Integrated Suit Technology (JSLIST) is a chemical and biological protective garment meant to be worn over the operational uniform of the user. It has an outer shell made up of a 50% nylon and 50% cotton poplin blend material with a water repellant finish. The liner layer consists of a nonwoven front laminated to activated carbon spheres and bonded to a tricot knit back that absorbs chemical agents. When the JSLIST coat and trousers are combined with boots, gloves, and a chemical protective mask, JSLIST provides protection against chemical and biological agents, radioactive fallout particles, and battlefield contaminants. The highest level of information that could be disclosed by the transfer of the JSLIST. Suit is UNCLASSIFIED. JSLIST is considered a U.S. military uniform item, and as such, any unit being sold to Foreign Military Sales customers will not utilize an actively-used U.S. military camouflage pattern in accordance with the Security Assistance Management Manual (SAMM), Chapter 4, paragraph 4.5.6. and 10 U.S.C. 771.

2. The M50 Joint Service General Purpose Mask is the U.S. Armed Forces' field protective mask. The system used two M61 filters integrated into the air inlet system to protect against nuclear, biological and chemical threats including select toxic industrial

chemicals. The highest level of information that could be disclosed by the transfer of the M50 is UNCLASSIFIED.

3. All defense articles and services listed in this transmittal are authorized for release and export to the Government of India.
