Title: Longitudinal Investigation of Gender, Health and Trauma (LIGHT) Survey.

OMB Control Number: 2900–NEW.

Type of Review: New Collection.

Abstract: The purpose of this study is to understand the cumulative effects of lifetime exposure to trauma and ongoing exposure to trauma such as community and intimate partner violence on Veterans’ mental and physical health, including its impact on the reproductive health of Veterans. To implement this research, VHA and entities working on behalf of VHA will conduct a nationwide longitudinal survey of Veterans residing in communities with varying levels of crime. Specifically, this longitudinal study will involve surveying Veterans regarding their life experiences, experiences within their neighborhood, mental health symptomatology, physical health, reproductive health, mental health service use, social support, and coping style three times over the course of approximately 1 year. We will contact a random sample of 14,000 Veterans (11,000 female and 3,000 male) between the ages of 18 and 45 obtained from VA DoD Identity Repository (VADIR) to invite them to participate in this study, with the ultimate goal of achieving a baseline sample of ~4,000 Veterans (~3,000 female and ~1,000 male). Given our primary aim to examine the role of community violence on outcomes, we will oversample for residency in high crime communities using zip codes to ensure that individuals living in these

areas are invited to participate and are, therefore, represented in the study sample. We will also oversample rural communities using zip codes. Finally, as we are explicitly interested in under-represented populations in the larger Veteran population, we will also oversample racial minorities. Our response rate target for the survey is ~30%, which is consistent with other recent surveys of the Veteran population. After adjusting for potentially unusable or ineligible records (estimated at ~8%), we predict ~4,000 will complete the study.

Title: Application for Extended Care Services.

OMB Control Number: 2900–0629.

Type of Review: Renewal of a currently approved collection.

Abstract: Title 38 U.S.C. Chapter 17 authorizes VA to provide hospital care, medical services, domiciliary care and nursing home care to eligible Veterans. Title 38 U.S.C. 1705 requires VA to design, establish and operate a system of annual patient enrollment in accordance with a series of stipulated priorities. A consequence of this is that many groups of Veterans who are in a lower priority group (WWI Veterans, Veterans with disabilities rated as 0% service-connected seeking treatment for other than their service-connected conditions, Veterans exposed to a toxic substance, radiation, or environmental hazard and nonservice-connected Veterans) may request that they be allowed to be income tested in order to gain a higher priority. Title 38 U.S.C. 1722 establishes eligibility assessment procedures for

cost-free VA medical care, based on income levels, which will determine whether nonservice-connected and 0% service-connected non-compensable Veterans are able to defray the necessary expenses of care for nonservice-connected conditions. Title 38 U.S.C. 1722A establishes the eligibility assessment procedures, based on income levels, for determining Veterans’ eligibility for cost-free medications and Title 38 U.S.C. 1710B defines the procedures for establishing eligibility for cost-free Extended Care benefits. Title 38 U.S.C. 1729 authorizes VA to recover from Veterans’ health insurance carriers the cost of care furnished for their nonservice-connected conditions. VA Form 10–10EC, Application for Extended Care Services, is used to collect financial information necessary to determine a Veteran’s copayment obligation for extended care services, also known as long term care (LTC).

Affected Public: Individuals and households.

Estimated Annual Burden: 3,000 hours.

Estimated Average Burden per Respondent: 90 minutes.

Frequency of Response: Annually.

Estimated Number of Respondents: 2,000.
