

Federal Regulations (CFR) at 50 CFR part 17 prohibit the “take” of fish or wildlife species listed as endangered or threatened. Take of listed fish or wildlife is defined under the Act as “to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct” (16 U.S.C. 1532(19)). However, under limited circumstances, we issue permits to authorize incidental take, *i.e.*, take that is incidental to, and not the purpose of, the carrying out of an otherwise lawful activity.

Regulations governing incidental take permits for threatened and endangered species are at 50 CFR 17.32 and 17.22, respectively. The ESA’s take prohibitions do not apply to federally listed plants on private lands unless such take would violate State law. In addition to meeting other criteria, an incidental take permit’s proposed actions must not jeopardize the existence of federally listed fish, wildlife, or plants.

Applicant’s Proposal

Orange Dale Venture, LLC, is requesting a 10-year ITP to take approximately 5 acres (ac) of occupied scrub-jay foraging and sheltering habitat incidental to construction of an energy substation. The 161.6-ac project site is located approximately 0.5 miles northwest of the intersection of Veterans Memorial Parkway and Saxon Boulevard within Section 14, Township 18 South, Range 30 East, Volusia County, Florida. The project includes construction of a residential and commercial development, and the associated clearing, infrastructure, and landscaping. The Applicant proposes to mitigate for the take of the scrub-jay, based on Service Mitigation Guidelines, by contributing funds in the amount of \$209,220.00 to the Nature Conservancy’s Conservation Fund for the management and conservation of the Florida scrub-jay.

Our Preliminary Determination

We have determined that the Applicant’s proposal, including the proposed mitigation and minimization measures, would have minor or negligible effects on the species covered in the HCP. Therefore, we have determined that the incidental take permit for this project is “low effect” and qualifies for categorical exclusion under the National Environmental Policy Act (NEPA), as provided by 43 CFR 46.205 and 43 CFR 46.210. A low-effect HCP is one involving (1) minor or negligible effects on federally listed or candidate species and their habitats, and (2) minor or negligible effects on

other environmental values or resources.

Next Steps

We will evaluate the HCP and comments we receive to determine whether the ITP application meets the requirements of section 10(a) of the Act. We will also evaluate whether issuance of the ITP complies with section 7 of the ESA by conducting an intra-Service consultation. We will use the results of this consultation, in combination with the above findings, in our final analysis to determine whether or not to issue the ITP. If the requirements are met, we will issue the issue ITP number TE39111C–0 to the Applicant.
