Section-by-Section-Analysis

Twelve CFR part 3 sets forth the OCC's minimum capital requirements and overall capital adequacy standards for national banks and Federal savings associations (institutions).

Section 3.3(c) allows for the recognition of netting across multiple types of transactions or agreements if an institution obtains a written legal opinion verifying the validity and enforceability of the agreement under certain circumstances and maintains sufficient written documentation of this legal review.

Section 3.22(h)(2)(iii)(A) permits the use of a conservative estimate of the amount of an institution's investment in its own capital or the capital of unconsolidated financial institutions held through the index security with prior approval by the OCC.

Section 3.37(c)(4)(i)(E), regarding collateralized transactions, requires that an institution have policies and procedures in place describing how it determines the period of significant financial stress used to calculate its own internal estimates for haircuts and be able to provide empirical support for the period used.

Section 3.41(b)(3) which sets forth operational requirements for securitization exposures, allows an institution to recognize for risk-based capital purposes, in the case of synthetic securitizations, a credit risk mitigant to hedge underlying exposures if certain conditions are met, including a requirement that the institution obtain a well-reasoned opinion from legal counsel that confirms the enforceability of the credit risk mitigant in all relevant jurisdictions.

Section 3.41(c)(2)(i) requires that an institution demonstrate its comprehensive understanding of a
