

related to installed smoke and CO alarms. The survey team will then test residents' smoke and CO alarms. If any of the alarms do not work, the survey team will offer to replace them free of charge.

B. Burden Hours

The survey interview will take between 20 to 60 minutes, depending on whether the survey is administered via the telephone (about 20 minutes) or by an in-home interview (60 minutes). We estimate the number of respondents to be 1,185. We estimate the total annual burden hours for respondents to be 1,422 hours based on the total time required to respond to the invitation, screener, and the actual survey. The monetized hourly cost is \$35.64, as defined by the average total hourly cost to employers for employee compensation for employees across all occupations as of September 2017, reported by the Bureau of Labor Statistics. Accordingly, we estimate the total annual cost burden to all respondents to be \$50,680. (1,422 hours × \$35.64 = \$50,680.). The total cost to the federal government for the contract to design and conduct the survey is \$721,773.

k. *Description of Project Facilities:* The project consists of: (a) A 10-foot-high, 25-foot-long, concrete, diversion weir and intake structure; (b) a 750-foot long, 30 by 36-inch-diameter, concrete tunnel; (c) a 11,400-foot-long, 24-inch-diameter, buried steel pipeline; (d) a 1,300-foot-long, 24-inch-diameter, buried steel penstock; (e) a 32-foot-long,

28-foot-wide, and 14-foot-high, masonry block powerhouse containing one horizontal Pelton turbine with an hydraulic capacity of 19 cubic feet per second (cfs) and a net hydraulic head of 362 feet, directly connected to single generator with a nameplate rating of 560 kilowatts; (f) a 2,400-foot-long, 12.5 kilovolt (kV), underground transmission line; and (g) appurtenant facilities.

l. *Description of Request:* The licensee proposes to surrender the project as it no longer intends to operate the project. The dam and intake facilities, including the concrete tunnel, were part of the original water structure when Morse Creek was the primary water source for the City of Port Angeles. These structures continue to be used to draw water for neighboring Clallam County Public Utility District (PUD). Since the dam structure pre-dates the hydroelectric project and would continue to serve as a water supply for the PUD and for emergency use by the City of Port Angeles, the dam structure will remain as is. The licensee will remove the generating equipment from the powerhouse and the penstock will be plugged with cement to stabilize the structure. The tailrace would be filled in to pre-project condition to prevent fish from becoming stranded during low-flow periods.
