History and Description of the Remains

At an unknown date, human remains representing a minimum of five individuals were removed from an unknown location south of Potosi, in Grant County, WI. The human remains were collected from the bank of the Mississippi River by a high school student, and were donated to the Mississippi River Museum in Dubuque, IA, on June 12, 1975 (accession #75–83.2). These human remains were transferred to the Office of the State Archaeologist Bioarchaeology Program in 1995. A middle-aged to old adult and an old adult, both of indeterminate sex, are represented by the human remains. Also present are three individuals aged 0.5 to 2.5 years, 5 to 9 years, and 9 to 15 years (Burial Project 910). No known individuals were identified. No associated funerary objects are present.

At an unknown date, human remains representing a minimum of one individual were removed from an unspecified mound, possibly near Garner Lake in Richland County, WI. The human remains were given to Richard Herrmann by Herman Bieg. At an unknown date, the human remains were donated to the Ham House Museum in Dubuque, IA. In 1986, the human remains were transferred to the Office of the State Archaeologist Bioarchaeology Program. A female between the ages of 25 and 45 years is represented by the human remains. Cranial metrics and dental morphology support the identification of this individual as Native American (Burial Project 655). No known individual was identified. No associated funerary objects are present.

Osteological analyses indicate the human remains are Native American. However, these human remains cannot be dated or attributed to a particular archeological context in Wisconsin and cannot be affiliated with any present-day Indian Tribe or group.
