Fisheries of the Northeastern United States; Scup Fishery; Framework Adjustment 10

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes modifications to the commercial scup quota periods, as recommended by the Mid-Atlantic Fishery Management Council. The proposed change would move the month of October from the Summer Period to the Winter II Period. This rule is intended to increase fishing opportunities by allowing for more scup to be landed by extending the Winter II Period when possession limits are higher.

DATES: Comments must be received by 5 p.m. local time, on March 13, 2018.

ADDRESSES: An environmental assessment (EA) was prepared for this action and describes the proposed measures and other considered alternatives, and provides an analysis of the impacts of the proposed measures and alternatives. Copies of the Scup Commercial Quota Period Modification Framework, including the EA, are available on request from Dr. Christopher M. Moore, Executive Director, Mid-Atlantic Fishery Management Council, Suite 201, 800

North State Street, Dover, DE 19901. These documents are also accessible via the internet at http://www.mafmc.org/s/Scup_quota_period_framework_draftEA_Nov2017.pdf.

SUPPLEMENTARY INFORMATION:

General Background

Scup (*Stenotomus chrysops*) is managed jointly by the Mid-Atlantic Fishery Management Council and the Atlantic States Marine Fisheries Commission through the Summer Flounder, Scup, Black Sea Bass Fishery Management Plan (FMP). The management unit specified in the FMP for scup is U.S. waters of the Atlantic Ocean from 35°13.3' N lat. (the latitude of Cape Hatteras Lighthouse, Buxton, NC) northward to the U.S./Canada

border. The scup stock is not overfished and it is not experiencing overfishing.

Currently, the scup commercial quota is broken into three periods: Winter I (January 1 through April 30) receives 45.11 percent of the annual quota; Summer (May 1 through October 31) receives 38.95 percent; and Winter II (November 1 through December 31) receives an initial 15.94 percent with any unused Winter I quota rolled over into Winter II. Federal trip limits are imposed during the two Winter Periods; states impose landing restrictions during the Summer Period. The Council established these quota periods in 1997 to recognize that there are two commercial fishing fleets (62 FR 27978; May 22, 1997). Larger vessels harvest scup offshore during the winter months and smaller vessels harvest scup inshore during the summer. Without the quota periods and Federal trip limits, the larger vessels would be able to fish the full annual quota early in the year, leaving no quota for the smaller inshore fleet.

The scup stock was declared rebuilt in 2009 based on the findings of a stock assessment. The commercial scup quota nearly doubled between 2010 and 2011. From 2011 to 2016, commercial scup landings have been 20 to 47 percent below the annual commercial quota. Stakeholders have stated that the more restrictive possession limits during the Summer Period, compared to the Winter I and II Periods, have prevented fishermen from landing high volumes of scup when they are available. This limits the ability of the fishery to achieve the annual commercial quota and results in forgone yield.

Proposed Action

In order to address these limits on the ability of the fishery to achieve the annual commercial quota, this action would move the month of October from the Summer Period to the Winter II Period (Table 1). This action would facilitate more landings at higher possession limits during longer periods of time. This change would be effective for October 2018 and is expected to have positive socioeconomic impacts compared to maintaining the status quo quota periods.

This action only considers a change to the seasons of the three quota periods. It is not changing the possession limits or the amount of quota allocated annually to each period.
