**SUPPLEMENTARY INFORMATION:** Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains and associated funerary objects under the control of the Oregon State University, NAGPRA Office. The human remains and associated funerary objects were removed from site 35LNC50, Lincoln County, OR; an unknown location along the Oregon Coast; and Yaquina Bay, Lincoln County, OR.

#### Consultation

A detailed assessment of the human remains was made by the Oregon State University, Department of Anthropology professional staff in consultation with representatives of the Confederated Tribes of Siletz Indians of Oregon (previously listed as the Confederated

Tribes of the Siletz Reservation). The Burns Paiute Tribe (previously listed as the Burns Paiute Tribe of the Burns Paiute Indian Colony of Oregon); Confederated Tribes of the Coos, Lower Umpqua and Siuslaw Indians; Confederated Tribes of the Grand Ronde Community of Oregon; Confederated Tribes of the Umatilla Indian Reservation (previously listed as the Confederated Tribes of the Umatilla Reservation, Oregon); Confederated Tribes of the Warm Springs Reservation of Oregon; Coquille Indian Tribe (previously listed as the Coquille Tribe of Oregon); Cow Creek Band of Umpqua Indians (previously listed as the Cow Creek Band of Umpqua Indians of Oregon); and Klamath Tribes were invited to consult but did not participate. Hereafter, all of the above Indian Tribes are referred to as "The Consulted and Notified Tribes."

#### History and Description of the Remains

At an unknown date, possibly in 1980, human remains representing, at minimum, one individual were removed from site 35LNC50, on the north side of Yaquina Head in Lincoln County, OR. Sometime after 2004, these human remains, together with one object, were found in a bag along with a note reading "from 35LNC50." As Dr. Richard E. Ross and Sandra L. Snyder, both associated with the Department of Anthropology at Oregon State University (OSU), excavated 35LNC50 in 1980, it is believed that these human remains are from that excavation. No known individuals were identified. The one associated funerary object is a lithic flake.

The Confederated Tribes of the Siletz Reservation, Oregon, are a confederation of 30 bands whose ancestral territory ranged along the entire Oregon coast and Coast Range, inland to the main divide of the Cascade Range, and southward to the Rogue River watershed and included site 35LNC50.

In July 1974, human remains representing, at minimum, one individual were removed from "Tom Creek," possibly located somewhere on the Oregon Coast according to documentation accompanying the human remains. No known individuals were identified. No associated funerary objects are present.

In 1957, human remains representing, at minimum, two individuals were removed from the south shore of Yaquina Bay in Lincoln County, OR. An OSU professor walking on the south shore of Yaquina Bay found the human remains and took them home. In March of 1994 he gave the human remains to the Department of Anthropology at

OSU. No known individuals were identified. The one associated funerary object is a faunal talus bone.

**SUPPLEMENTARY INFORMATION:** In accordance with the Paperwork Reduction Act of 1995, we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps that the public understand our information collection requirements and provide the requested data in the desired format.

We published a notice, with a 60-day public comment period soliciting

comments on this collection of information, in the **Federal Register** on August 31, 2018 (83 FR 44662). During the 60-day period, we specifically reached out to seven companies impacted by this information collection renewal (ICR) to request input. In response to the outreach, we received seven responsive comments.

The first comment that we received stated the following:

*"I've looked at the FRN material and the amount of time in the document is pretty accurate with the amount of time it takes me to submit my monthly OGORS and PASRs. 648 lines submit monthly 7,776 lines submit yearly 25% lines require manual intervention 3 minutes: 1,944 lines done manually 5,832 minutes per year on manual lines 97.2 hours per year on manual lines"*

The second comment that we received stated the following:

*"I have read the attached FRN 44662 and have no comments at this time."*

The third comment that we received stated the following:

*"Hope all is well. I reviewed the FRN and I currently have no questions."*

The fourth comment that we received stated the following:

*"[We] reviewed the highlighted (pink) paragraphs and we agree that we are currently submitting Form 4054 Oil and Gas Operations Report and Form 4058 Production Allocation Schedule Report. We have no problems submitting these reports each month to ONRR. Let me know if you need anything else."*

The fifth comment that we received stated the following:

*"Because of the size of our reporting, we spend more time on both OGORS and 2014 reporting and I entered the estimated burden hours and sent it back. I don't have no other comments or questions at this time."*

The sixth comment that we received stated the following:

*"I have surveyed the royalty reporting group and the only comments offered is listed below."*

*Suggested improvement for the Data Warehouse.*

*The analysts would like to be able to have Product Code as one of the selection criteria on the first screen of the "Basic Royalty Report".*

*No comments related to the 2014 royalty reports."*

The seventh comment that we received stated the following:

*"Thank you for reaching out to us. We have no additional updates/comments that we see fit to be made at this time."*

Once again, we are soliciting comments on this proposed ICR that is
