Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the

burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: EPA is required under Section 183(e) of the Clean Air Act to regulate Volatile Organic Compound (VOC) emissions from the use of consumer and commercial products. Under regulations promulgated on February 26, 2007 (72 FR 8428) manufacturers of new portable gasoline containers are required to obtain certificates of conformity with the Clean Air Act, effective January 1, 2009. This ICR covers the burdens associated with this certification process. EPA reviews information submitted in a manufacturer's application for certification to determine if the gasoline container design conforms to applicable regulatory requirements and to verify that the required testing has been performed. The certificate holder is required to keep records on the testing and collect and keep warranty and defect information for annual reporting on in-use performance of their products. The respondent must also retain records on the units produced, apply serial numbers to individual containers, and track the serial numbers to their certificates of conformity. Any information submitted for which a claim of confidentiality is made is safeguarded according to EPA regulations at 40 CFR 2.201 *et seq.*

Form Numbers: None.

Respondents/affected entities: Manufacturers of new portable gasoline containers from 0.25 to 10.0 gallons in capacity.

Respondent's obligation to respond: Mandatory 40 CFR part 59, subpart F.

Estimated number of respondents: 8 (total).

Frequency of response: Yearly for warranty reports; at least once every five years for certificate renewals.

Total estimated burden: 206.9 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$22,028.90 (per year), includes \$12,552 annualized capital or operation & maintenance costs.

Changes in Estimates: There is a reduction of 43.1 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease of the estimated burden and cost estimates is due to a change in the estimated cost of labor and additional testing requirements for new portable fuel container families to comply with the requirements for evaporative testing promulgated in 40 CFR part 59.

Dated: April 17, 2019.

Director, Compliance Division, Office of Transportation and Air Quality, U.S. Environmental Protection Agency.

Planning for Natural Disaster Debris Guidance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is announcing the availability of a final guidance entitled, Planning for Natural Disaster Debris. The Planning for Natural Disaster Debris guidance is intended to assist communities in planning for debris management before a natural disaster occurs (also referred to as “pre-incident debris management planning”). This guidance revises EPA's existing guidance document on planning for natural disaster debris that was published in 2008 under the same name. Pre-incident planning can significantly aid decision-making during a response and enhance a community's resiliency. Pre-incident planning can help communities recover faster, spend less money on cleanup and debris/waste management, and use fewer resources to rebuild and recover.

DATES: The announcement of the guidance is published in the **Federal Register** on April 24, 2019.

ADDRESSES: EPA has established a docket for this action under Docket ID
