### Foreign-Trade Zones Board

[B-29-2019]

#### **Foreign-Trade Zone (FTZ) 18—San Jose, California; Notification of Proposed Production Activity; Lam Research Corporation (Wafer Fabrication Equipment, Subassemblies and Related Parts), Fremont, Livermore and Newark, California**

Lam Research Corporation (Lam) submitted a notification of proposed production activity to the FTZ Board for its facilities in Fremont, Livermore and Newark, California. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on April 25, 2019.

Lam already has authority to produce wafer manufacturing equipment within Subzone 18F. The current request would add a finished product and foreign status materials/components to the scope of authority. Pursuant to 15 CFR 400.14(b), additional FTZ authority would be limited to the specific foreign-status materials/components and specific finished product described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt Lam from customs duty payments on the foreign-status materials/components used in export production. On its domestic sales, for the foreign-status materials/components noted below and in the existing scope of authority, Lam would be able to choose the duty rates during customs entry procedures that apply to parts and assemblies of semiconductor manufacturing equipment (duty-free). Lam would be able to avoid duty on foreign-status components which become scrap/waste. Customs duties also could possibly be deferred or reduced on foreign-status production equipment.
