DEPARTMENT OF HEALTH AND HUMAN SERVICES

Privacy Act of 1974; System of Records

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Notice of a Modified System of Records.

SUMMARY: The Department of Health and Human Services (HHS), Centers for Medicare & Medicaid Services (CMS), proposes to modify an existing system of records subject to the Privacy Act, System No. 09-70-0541, titled Medicaid Statistical Information System (MSIS). This system of records covers the national Medicaid dataset, consisting of standardized enrollment, eligibility, and paid claims data about Medicaid recipients which is used to administer Medicaid at the federal level, produce statistical reports, support Medicaid related research, and assist in the detection of fraud and abuse in the Medicare and Medicaid programs. CMS is changing the name of the system of records to Transformed-Medicaid Statistical Information System (T-MSIS) and making other modifications which are explained below.

DATES: In accordance with 5 United States Code (U.S.C.) 552a(e)(4) and (11), this notice is applicable February 6, 2019, subject to a 30-day period in which to comment on the routine uses. Submit any comments by March 8, 2019.

ADDRESSES: Written comments should be submitted by mail or email to: CMS Privacy Act Officer, Division of Security, Privacy Policy & Governance, Information Security & Privacy Group, Office of Information Technology, CMS, Location N1-14-56, 7500 Security Blvd., Baltimore, MD 21244-1870, or walter.stone@cms.hhs.gov.

FOR FURTHER INFORMATION CONTACT: General questions about the system of records may be submitted to Darlene Anderson, Health Insurance Specialist, Data and Systems Group, Center for Medicaid and CHIP Services (CMCS), CMS, Mail Stop S2-22-16, 7500 Security Blvd., Baltimore, MD 21244; telephone number (410) 786-9828; email address Darlene.Anderson@cms.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Program and IT System Changes Prompting this SORN Modification

The Transformed Medicaid Statistical Information System (T-MSIS) is replacing the Medicaid Statistical

Information System (MSIS) as the information technology (IT) system that houses the national Medicaid dataset. It is a joint effort by the states and CMS to build an improved Medicaid dataset that addresses problems identified with Medicaid data in MSIS. T-MSIS provides improved program monitoring and oversight, technical assistance with states, policy implementation, and data-driven and high-quality Medicaid and CHIP programs that ensure better care, access to coverage, and improved health.

To improve Medicaid program oversight, CMS is requiring states to submit new files and data elements in T-MSIS which were not collected in MSIS, for the purpose of improving the quality of the data extracts the states submit to CMS on a quarterly or other periodic basis. Following consultation with a wide array of stakeholders, CMS established over 1,000 data elements for T-MSIS. This expands on the approximately 400 data elements collected in MSIS. T-MSIS builds on the original five MSIS files, consisting of eligibility files and four types of claims files (inpatient, long-term care, pharmacy, and other), by adding files for third-party liability, managed-care plans, and Medicaid providers, and by adding T-MSIS analytic files (TAF).

Currently, each state submits five extracts to CMS on a quarterly basis. These data are used by CMS to assist in federal reporting for the Medicaid and Children's Health Insurance Program (CHIP). Several reasons culminated in the CMS mission to improve the Medicaid dataset repository, including incomplete data, questionable results, multiple data collections from states, multiple federal data platforms and analytic difficulties in interpreting and presenting the results. In addition, timeliness issues have prompted CMS to re-evaluate its processes and move toward a streamlined delivery, along with an enhanced data repository. The new T-MSIS extract format is expected to further CMS goals for improved timeliness, reliability and robustness through monthly updates and an increase in the amount of data requested.

II. Modifications to SORN 09-70-0541

The following modifications have been made to SORN 09-70-0541 in order to reflect changes to the system of records resulting from the IT system change from MSIS to T-MSIS and to update the SORN generally:

- The SORN has been reformatted to conform to the revised template prescribed in OMB Circular A-108, issued December 23, 2016.
