SUPPLEMENTARY INFORMATION:

NAWCAD is the Navy's action proponent for activities in the PRC, and is based at Naval Air Station (NAS) Patuxent River, Maryland approximately 60 miles southeast of Washington, DC. The PRC is a Major Range and Test Facility Base with the mission of testing Navy and Marine Corps aircraft, aircraft systems, and inert weapons in the military restricted and surrounding airspace that overlies the middle Chesapeake Bay water range, the southern end of the Potomac and Patuxent Rivers, as well as lands in Maryland, Virginia, and Delaware. The PRC is critical to supporting NAWCAD's mission to deliver high quality, affordable aircraft products and services in support of Navy and Marine Corps military readiness. Navy pilots also conduct training flights within the PRC.

The proposed action is to continue conducting military testing and training activities within the PRC to meet current and projected military readiness requirements. The proposed action includes testing and training activities analyzed in the 1998 PRC Final EIS and subsequent environmental assessments, as well as adjustments to current testing and training activities to support projected Navy readiness requirements into the foreseeable future.

The purpose of the proposed action is to provide Sailors and Marines with equipment and technology that operates effectively and safely to support current and projected future military readiness requirements.

The need for the proposed action is to maintain military readiness of naval forces capable of winning wars, deterring aggression, and maintaining freedom of the seas, now and into the future, consistent with Title 10, Section 5062, of the United States Code.

The Navy will evaluate the potential environmental impacts from a No Action Alternative and action alternatives, and will analyze potential impacts on environmental resources from activities included in the alternatives. These environmental resources include, but are not limited to: Biological resources (e.g., aquatic and terrestrial protected species); water resources and sediments; air quality; airborne noise; cultural resources; socioeconomics; land use; public health and safety; hazardous material and waste; and environmental justice.

The scoping process is helpful in identifying public concerns and local issues to be considered during the development of the Draft EIS. Federal, state, and local agencies; federally recognized tribes; and interested persons are encouraged to provide substantive comments to the Navy on environmental resources and issue areas of concern that the commenter believes the Navy should consider. All comments, provided orally or in writing at the scoping meetings, submitted via the EIS website, or mailed, will be taken into consideration during the development of the Draft EIS.

Dated: February 15, 2019.

Commander, Judge Advocate General's Corps, U.S. Navy, Federal Register Liaison Officer.
