

§ 76.701

47 CFR Ch. I (10–1–08 Edition)

SCTE 65 2002 (formerly DVS 234): “Service Information Delivered Out-of-Band for Digital Cable Television” (incorporated by reference, *see* § 76.602).

(C) Event information data when present shall conform to ANSI/SCTE 65 2002 (formerly DVS 234): “Service Information Delivered Out-of-Band for Digital Cable Television” (incorporated by reference, *see* § 76.602) (profiles 4 or higher).

(D) Each channel shall be identified by a one- or two-part channel number and a textual channel name; and

(E) The channel number identified with out-of-band signaling information data should match the channel identified with in-band PSIP data for all unscrambled in-the-clear services.

(2) All digital cable systems shall comply with:

(i) SCTE 28 2003 (formerly DVS 295): “Host-POD Interface Standard” (incorporated by reference, *see* § 76.602).

(ii) SCTE 41 2003 (formerly DVS 301): “POD Copy Protection System” (incorporated by reference, *see* § 76.602).

(3) Cable operators shall ensure, as to all digital cable systems, an adequate supply of PODs that comply with the standards specified in paragraph (b)(2) of this section to ensure convenient access to such PODs by customers. Without limiting the foregoing, cable operators may provide more advanced PODs (*i.e.*, PODs that are based on successor standards to those specified in paragraph (b)(2) of this section) to customers whose unidirectional digital cable products are compatible with the more advanced PODs.

(4) Cable operators shall:

(i) Effective April 1, 2004, upon request of a customer, replace any leased high definition set-top box, which does not include a functional IEEE 1394 interface, with one that includes a functional IEEE 1394 interface or upgrade the customer’s set-top box by download or other means to ensure that the IEEE 1394 interface is functional.

(ii) Effective July 1, 2005, include both a DVI or HDMI interface and an IEEE 1394 interface on all high definition set-top boxes acquired by a cable operator for distribution to customers.

(iii) Ensure that these cable operator-provided high definition set-top

boxes shall comply with ANSI/SCTE 26 2001 (formerly DVS 194): “Home Digital Network Interface Specification with Copy Protection” (incorporated by reference, *see* § 76.602), with transmission of bit-mapped graphics optional, and shall support the CEA-931-A: “Remote Control Command Pass-through Standard for Home Networking” (incorporated by reference, *see* § 76.602), pass through control commands: tune function, mute function, and restore volume function. In addition these boxes shall support the power control commands (power on, power off, and status inquiry) defined in A/VC Digital Interface Command Set General Specification Version 4.0 (as referenced in ANSI/SCTE 26 2001 (formerly DVS 194): “Home Digital Network Interface Specification with Copy Protection” (incorporated by reference, *see* § 76.602)).

Subpart L—Cable Television Access

§ 76.701 Leased access channels.

(a) Notwithstanding 47 U.S.C. 532(b)(2) (Communications Act of 1934, as amended, section 612), a cable operator, in accordance with 47 U.S.C. 532(h) (Cable Consumer Protection and Competition Act of 1992, section 10(a)), may adopt and enforce prospectively a written and published policy of prohibiting programming which, it reasonably believes, describes or depicts sexual or excretory activities or organs in a patently offensive manner as measured by contemporary community standards.

(b) A cable operator may refuse to transmit any leased access program or portion of a leased access program that the operator reasonably believes contains obscenity, indecency or nudity.

NOTE TO PARAGRAPH (b): “Nudity” in paragraph (b) is interpreted to mean nudity that is obscene or indecent.

[62 FR 28373, May 23, 1997, as amended at 64 FR 35950, July 2, 1999]

§ 76.702 Public access.

A cable operator may refuse to transmit any public access program or portion of a public access program that

the operator reasonably believes contains obscenity.

[62 FR 28373, May 23, 1997]

Subpart M—Cable Inside Wiring

§ 76.800 Definitions.

(a) *MDU*. A multiple dwelling unit building (e.g., an apartment building, condominium building or cooperative).

(b) *MDU owner*. The entity that owns or controls the common areas of a multiple dwelling unit building.

(c) *MVPD*. A multichannel video programming distributor, as that term is defined in Section 602(13) of the Communications Act, 47 U.S.C. 522(13).

(d) *Home run wiring*. The wiring from the demarcation point to the point at which the MVPD's wiring becomes devoted to an individual subscriber or individual loop.

[62 FR 61031, Nov. 14, 1997]

§ 76.801 Scope.

The provisions of this subpart set forth rules and regulations for the disposition, after a subscriber voluntarily terminates cable service, of that cable home wiring installed by the cable system operator or its contractor within the premises of the subscriber. The provisions do not apply where the cable home wiring belongs to the subscriber, such as where the operator has transferred ownership to the subscriber, the operator has been treating the wiring as belonging to the subscriber for tax purposes, or the wiring is considered to be a fixture by state or local law in the subscriber's jurisdiction. Nothing in this subpart shall affect the cable system operator's rights and responsibilities under § 76.617 to prevent excessive signal leakage while providing cable service, or the cable operator's right to access the subscriber's property or premises.

[58 FR 11971, Mar. 2, 1993]

§ 76.802 Disposition of cable home wiring.

(a)(1) Upon voluntary termination of cable service by a subscriber in a single unit installation, a cable operator shall not remove the cable home wiring unless it gives the subscriber the oppor-

tunity to purchase the wiring at the replacement cost, and the subscriber declines. If the subscriber declines to purchase the cable home wiring, the cable system operator must then remove the cable home wiring within seven days of the subscriber's decision, under normal operating conditions, or make no subsequent attempt to remove it or to restrict its use.

(2) Upon voluntary termination of cable service by an individual subscriber in a multiple-unit installation, a cable operator shall not be entitled to remove the cable home wiring unless: it gives the subscriber the opportunity to purchase the wiring at the replacement cost; the subscriber declines, and neither the MDU owner nor an alternative MVPD, where permitted by the MDU owner, has provided reasonable advance notice to the incumbent provider that it would purchase the cable home wiring pursuant to this section if and when a subscriber declines. If the cable system operator is entitled to remove the cable home wiring, it must then remove the wiring within seven days of the subscriber's decision, under normal operating conditions, or make no subsequent attempt to remove it or to restrict its use.

(3) The cost of the cable home wiring is to be based on the replacement cost per foot of the wiring on the subscriber's side of the demarcation point multiplied by the length in feet of such wiring, and the replacement cost of any passive splitters located on the subscriber's side of the demarcation point.

(b) During the initial telephone call in which a subscriber contacts a cable operator to voluntarily terminate cable service, the cable operator—if it owns and intends to remove the home wiring—must inform the subscriber:

(1) That the cable operator owns the home wiring;

(2) That the cable operator intends to remove the home wiring;

(3) That the subscriber has the right to purchase the home wiring; and

(4) What the per-foot replacement cost and total charge for the wiring would be (the total charge may be based on either the actual length of cable wiring and the actual number of
