

In such cases, the Commission shall issue a determination indicating whether the underlying digital output protection technology or recording method is approved for use with covered demodulator products.

(c) *Effect of subsequent certifications.* Where a proponent of a digital output protection technology or recording method files a certification pursuant to paragraph (a) of this section subsequent to the initial certification window described in paragraph (b) of this section:

(1) If no objections are received in response to a proponent's certification within twenty (20) days after the date of public notice of the filing of such certification, the Commission shall expeditiously issue a determination indicating whether the underlying digital output protection technology or recording method is approved for use with covered demodulator products.

(2) If an objection is raised within twenty (20) days after the date of public notice of the filing of a proponent's certification alleging that such certification contains insufficient information to evaluate the appropriateness of the underlying digital output protection technology or recording method for use with covered demodulator products, the proponent may file a reply within 10 days after the close of the twenty (20) day opposition window. The Commission shall determine whether to dismiss the certification without prejudice or to undertake a full review of the certification's merits pursuant to paragraph (d) of this section.

(3) If an objection is raised within twenty (20) days after the date of public notice of the filing of a proponent's certification alleging that the underlying digital output protection technology or recording method is inappropriate for use with covered demodulator products, the proponent may file a reply within 10 days after the close of the twenty (20) day opposition window. The Commission shall undertake a full review of the certification's merits pursuant to paragraph (d) of this section. In such cases, the Commission shall issue a determination indicating whether the underlying digital output protection technology or

recording method is approved for use with covered demodulator products.

(d) *Commission determinations.* Where the Commission undertakes a full review of the merits of a certification for a digital output protection technology or recording method, the Commission may consider, where applicable, the following factors:

(1) Technological factors including but not limited to the level of security, scope of redistribution, authentication, upgradability, renewability, interoperability, and the ability of the digital output protection technology to revoke compromised devices;

(2) The applicable licensing terms, including compliance and robustness rules, change provisions, approval procedures for downstream transmission and recording methods, and the relevant license fees;

(3) The extent to which the digital output protection technology or recording method accommodates consumers' use and enjoyment of unencrypted digital terrestrial broadcast content; and

(4) Any other relevant factors the Commission determines warrant consideration.

(e) *Revocation of approval.* (1) If the security of a content protection technology or recording method approved for use in covered demodulator products has been compromised, a person may seek revocation of such approval pursuant to § 76.7 of this chapter.

(2) Petitioners seeking revocation of a content protection technology or recording method's approval for use in covered demodulator products shall articulate in detail the extent to which the content protection or recording technology has been compromised and demonstrate why alternative measures are insufficient to address the breach in security.

#### § 73.9009 Manufacture for exportation.

The requirements of this subpart do not apply to demodulators, covered demodulator products or peripheral TSP products manufactured in the United States solely for export.
