

§ 22.946

(c) The FCC may accept and grant applications for consent to transfer of control or for assignment of authorization if the transfer or assignment is pro forma and does not involve a change in ownership.

[67 FR 77192, Dec. 17, 2002]

§ 22.946 Service commencement and construction systems.

(a) *Commencement of service.* New cellular systems must be at least partially constructed and begin providing cellular service to subscribers within the service commencement periods specified in Table H-1 of this section. Service commencement periods begin on the date of grant of the initial authorization, and are not extended by the grant of subsequent authorizations for the cellular system (such as for major modifications). The licensee must notify the FCC (FCC Form 601) after the requirements of this section are met (*see* § 1.946 of this chapter).

TABLE H-1—COMMENCEMENT OF SERVICE

| Type of cellular system | Required to commence service in |
|--|---------------------------------|
| The first system authorized on each channel block in markets 1–90. | 36 months. |
| The first system authorized on each channel block in all other markets and any subsequent systems authorized pursuant to contracts in partitioned markets. | 18 months. |
| The first system authorized on each channel block in the Gulf of Mexico Exclusive Zone. | No requirement. |
| All other systems | 12 months. |

(b) To satisfy this requirement, a cellular system must be interconnected with the public switched telephone network (PSTN) and must be providing service to mobile stations operated by its subscribers and roamers. A cellular system is considered to be providing service only if mobile stations can originate telephone calls to and receive telephone calls from wireline telephones through the PSTN.

(c) *Construction period for specific facilities.* The construction period applicable to specific new or modified cellular facilities for which a separate authorization is granted is one year, be-

47 CFR Ch. I (10–1–12 Edition)

ginning on the date the authorization is granted.

[67 FR 9609, Mar. 4, 2002, as amended at 67 FR 77192, Dec. 17, 2002]

§ 22.947 Five year build-out period.

Except for systems authorized in the Gulf of Mexico Exclusive Zone, the licensee of the first cellular system authorized on each channel block in each cellular market is afforded a five year period, beginning on the date the initial authorization for the system is granted, during which it may expand the system within that market.

(a) *Exclusive right to expand within market.* Except as provided in paragraph (b) of this section, the FCC does not accept applications for authority to operate a new cellular system in any unserved area in a market on a channel block during the five year build-out period.

(b) *Partitioned markets.* During the five-year build-out period, the licensee of the first cellular system on each channel block in each market may enter into contracts with eligible parties, allowing such parties to apply by using FCC Form 601 for a new cellular system in that channel block within the market. The FCC may grant such applications if they are in compliance with the rules in this part. Markets with two or more authorized cellular systems on the same channel block during the five year build-out period are referred to (with respect to the affected channel block) as “partitioned markets”.

(1) Partitioning contracts must define the CGSA of the subsequent cellular system in accordance with § 22.911, including any expansion rights ceded. If not exercised, any such expansion rights terminate at the end of the five year build-out period.

(2) The five year build-out period begins on the date the initial authorization for the first cellular system is granted, and is not extended or affected in any way by the initial authorization of any subsequent cellular systems pursuant to paragraph (b) of this section.

(c) *System information update.* Sixty days before the end of the five year build-out period, the licensee of each cellular system authorized on each channel block in each cellular market
