§51.325

incumbent LEC structure, collocation in adjacent controlled environmental vaults, controlled environmental huts, or similar structures located at the incumbent LEC premises to the extent technically feasible. The incumbent LEC must permit a requesting telecommunications carrier to construct or otherwise procure such an adjacent structure, subject only to reasonable safety and maintenance requirements. The incumbent must provide power and physical collocation services and facilities, subject to the same nondiscrimination requirements as applicable to any other physical collocation arrangement. The incumbent LEC must permit the requesting carrier to place its own equipment, including, but not limited to, copper cables, coaxial cables, fiber cables, and telecommunications equipment, in adjacent facilities constructed by the incumbent LEC, the requesting carrier, or a thirdparty. If physical collocation space becomes available in a previously exhausted incumbent LEC structure. the incumbent LEC must not require a carrier to move, or prohibit a competitive LEC from moving, a collocation arrangement into that structure. Instead, the incumbent LEC must continue to allow the carrier to collocate in any adjacent controlled environmental vault, controlled environmental vault, or similar structure that the carrier has constructed or otherwise procured.

- (1) An incumbent LEC must offer to provide and provide all forms of physical collocation (*i.e.*, caged, cageless, shared, and adjacent) within the following deadlines, except to the extent a state sets its own deadlines or the incumbent LEC has demonstrated to the state commission that physical collocation is not practical for technical reasons or because of space limitations.
- (1) Within ten days after receiving an application for physical collocation, an incumbent LEC must inform the requesting carrier whether the application meets each of the incumbent LEC's established collocation standards. A requesting carrier that resubmits a revised application curing any deficiencies in an application for physical collocation within ten days after being informed of them retains its posi-

tion within any collocation queue that the incumbent LEC maintains pursuant to paragraph (f)(1) of this section.

- (2) Except as stated in paragraphs (1)(3) and (1)(4) of this section, an incumbent LEC must complete provisioning of a requested physical collocation arrangement within 90 days after receiving an application that meets the incumbent LEC's established collocation application standards.
- (3) An incumbent LEC need not meet the deadline set forth in paragraph (1)(2) of this section if, after receipt of any price quotation provided by the incumbent LEC, the telecommunications carrier requesting collocation does not notify the incumbent LEC that physical collocation should proceed.
- (4) If, within seven days of the requesting carrier's receipt of any price quotation provided by the incumbent LEC, the telecommunications carrier requesting collocation does not notify the incumbent LEC that physical collocation should proceed, then the incumbent LEC need not complete provisioning of a requested physical collocation arrangement until 90 days after receiving such notification from the requesting telecommunications carrier.

§ 51.325 Notice of network changes: Public notice requirement.

- (a) An incumbent local exchange carrier ("LEC") must provide public notice regarding any network change that:
- (1) Will affect a competing service provider's performance or ability to provide service;
- (2) Will affect the incumbent LEC's interoperability with other service providers; or
- (3) Will affect the manner in which customer premises equipment is attached to the interstate network.
- (4) Will result in the retirement of copper loops or copper subloops, and the replacement of such loops with fiber-to-the-home loops or fiber-to-the-curb loops, as those terms are defined in §51.319(a)(3).
- (b) For purposes of this section, *inter-operability* means the ability of two or

more facilities, or networks, to be connected, to exchange information, and to use the information that has been exchanged.

- (c) Until public notice has been given in accordance with §\$51.325 through 51.335, an incumbent LEC may not disclose to separate affiliates, separated affiliates, or unaffiliated entities (including actual or potential competing service providers or competitors), information about planned network changes that are subject to this section.
- (d) For the purposes of §§51.325 through 51.335, the term *services* means telecommunications services or information services.

[61 FR 47351, Sept. 6, 1996, as amended at 64 FR 14148, Mar. 24, 1999; 68 FR 52305, Sept. 2, 2003; 69 FR 77954, Dec. 29, 2004]

§ 51.327 Notice of network changes: Content of notice.

- (a) Public notice of planned network changes must, at a minimum, include:
- (1) The carrier's name and address;
- (2) The name and telephone number of a contact person who can supply additional information regarding the planned changes;
- (3) The implementation date of the planned changes;
- (4) The location(s) at which the changes will occur;
- (5) A description of the type of changes planned (Information provided to satisfy this requirement must include, as applicable, but is not limited to, references to technical specifications, protocols, and standards regarding transmission, signaling, routing, and facility assignment as well as references to technical standards that would be applicable to any new technologies or equipment, or that may otherwise affect interconnection); and
- (6) A description of the reasonably foreseeable impact of the planned changes.
- (b) The incumbent LEC also shall follow, as necessary, procedures relating to confidential or proprietary information contained in §51.335.

[61 FR 47351, Sept. 6, 1996]

§51.329 Notice of network changes: Methods for providing notice.

- (a) In providing the required notice to the public of network changes, an incumbent LEC may use one of the following methods:
- (1) Filing a public notice with the Commission; or
- (2) Providing public notice through industry fora, industry publications, or the carrier's publicly accessible Internet site. If an incumbent LEC uses any of the methods specified in paragraph (a)(2) of this section, it also must file a certification with the Commission that includes:
- (i) A statement that identifies the proposed changes;
- (ii) A statement that public notice has been given in compliance with §§ 51.325 through 51.335; and
- (iii) A statement identifying the location of the change information and describing how this information can be obtained.
- (b) Until the planned change is implemented, an incumbent LEC must keep the notice available for public inspection, and amend the notice to keep the information complete, accurate and up-to-date.
- (c) Specific filing requirements. Commission filings under this section must be made as follows:
- (1) The public notice or certification must be labeled with one of the following titles, as appropriate: "Public Notice of Network Change Under Rule 51.329(a)," "Certification of Public Notice of Network Change Under Rule 51.329(a)," "Short Term Public Notice Under Rule 51.333(a)," or "Certification of Short Term Public Notice Under Rule 51.333(a)."
- (2) The incumbent LEC's public notice and any associated certifications shall be filed through the Commission's Electronic Comment Filing System (ECFS), using the "Submit a Non-Docketed Filing" module. All subsequent filings responsive to a notice may be filed using the Commission's ECFS under the docket number set forth in the Commission's public notice for the proceeding. Subsequent filings responsive to a notice also may be filed by sending one paper copy of the filing to "Secretary, Federal Communications Commission, Washington, DC
