Subpart D—Universal Service Support for High Cost Areas

§ 54.301 Local switching support.

(a) *Calculation of local switching support.* (1) Beginning January 1, 1998 and ending December 31, 2011, an incumbent local exchange carrier that has been designated an eligible telecommunications carrier and that serves a study area with 50,000 or fewer access lines shall receive support for local switching costs using the following formula: The carrier's projected annual unseparated local switching revenue requirement, calculated pursuant to paragraph (d) of this section, shall be multiplied by the local switching support factor. Beginning January 1, 2012 and ending June 30, 2012, a rate-of-return carrier, as that term is defined in § 54.5 of this chapter, that is an incumbent local exchange carrier that has been designated an eligible telecommunications carrier and that serves a study area with 50,000 or fewer access lines and is not affiliated with a price cap carrier, as that term is defined in § 61.3(aa) of this chapter, shall receive support for local switching costs frozen at the same support level received for calendar year 2011, subject to true-up. For purposes of this section, local switching costs shall be defined as Category 3 local switching costs under part 36 of this chapter. Beginning January 1, 2012, no carrier that is a price cap carrier, as that term is defined in § 61.3(aa) of this chapter, or a rate-of-return carrier, as that term is defined in § 54.5 of this chapter, that is affiliated with a price cap carrier, shall receive local switching support. Beginning July 1, 2012, no carrier shall receive local switching support.

(2) *Local switching support factor.* (i) The local switching support factor

shall be defined as the difference between the 1996 weighted interstate DEM factor, calculated pursuant to § 36.125(f) of this chapter, and the 1996 unweighted interstate DEM factor.

(ii) If the number of a study area's access lines increases such that, under § 36.125(f) of this chapter, the weighted interstate DEM factor for 1997 or any successive year would be reduced, that lowered weighted interstate DEM factor shall be applied to the study area's 1996 unweighted interstate DEM factor to derive a new local switching support factor. If the number of a study area's access lines decreases or has decreased such that, under § 36.125(f) of this chapter, the weighted interstate DEM factor for 2010 or any successive year would be raised, that higher weighted interstate DEM factor shall be applied to the study area's 1996 unweighted interstate DEM factor to derive a new local switching support factor.

(3) Beginning January 1, 1998, the sum of the unweighted interstate DEM factor, as defined in § 36.125(a)(5) of this chapter, and the local switching support factor shall not exceed 0.85. If the sum of those two factors would exceed 0.85, the local switching support factor shall be reduced to a level that would reduce the sum of the factors to 0.85.

(b) *Submission of data to the Administrator.* Until October 1, 2011, each incumbent local exchange carrier that has been designated an eligible telecommunications carrier and that serves a study area with 50,000 or fewer access lines shall, for each study area, provide the Administrator with the projected total unseparated dollar amount assigned to each account listed below for the calendar year following each filing. This information must be provided to the Administrator no later than October 1 of each year. The Administrator shall use this information to calculate the projected annual unseparated local switching revenue requirement pursuant to paragraph (d) of this section.

(6) Central Office Switching, Operator Systems, and Central Office Transmission Expenses (Account 6210, Account 6220, Account 6230) shall be allocated according to the following factor:

47 CFR Ch. I (10–1–15 Edition)

Account 2210 Category 3 + (Accounts 2210 + 2220 + 2230).

(d) *Calculation of the projected annual unseparated local switching revenue requirement.* The Administrator shall calculate the projected annual unseparated local switching revenue requirement by summing the components listed in this paragraph.

(1) Return on Investment attributable to COE Category 3 shall be obtained by multiplying the average projected unseparated local switching net investment by the authorized interstate rate of return. Projected unseparated local switching net investment shall be calculated as of each December 31 by deducting the accumulated reserves, deferrals and customer deposits attributable to the COE Category 3 investment from the gross investment attributable to COE Category 3. The average projected unseparated local switching net investment shall be calculated by summing the projected unseparated local switching net investment as of December 31 of the calendar year following the filing year and such investment as of December 31 of the filing year and dividing by 2.

(2) Depreciation expense attributable to COE Category 3 investment, allocated pursuant to paragraph (c) of this section.

(3) All expenses, excluding depreciation expense, collected in paragraph (b) of this section, allocated pursuant to paragraph (c) of this section.

(4) Federal income tax attributable to COE Category 3 shall be calculated using the following formula; the accounts listed shall be allocated pursuant to paragraph (c) of this section:

$$[\text{Return on Investment attributable to COE Category 3—Included in Account 7300—Account 7500—Account 7210}] \times [\text{Federal Income Tax Rate (1—Federal Income Tax Rate)}].$$

(e) *True-up adjustment*—(1) *Submission of true-up data.* Until December 31, 2012, each incumbent local exchange carrier that has been designated an eligible telecommunications carrier and that serves a study area with 50,000 or fewer access lines shall, for each study area, provide the Administrator with the historical total unseparated dollar amount assigned to each account listed in paragraph (b) of this section for each

Federal Communications Commission

§ 54.304

calendar year no later than 12 months after the end of such calendar year

(2) *Calculation of true-up adjustment.*

(i) The Administrator shall calculate the historical annual unseparated local switching revenue requirement for each carrier when historical data for each calendar year are submitted.

(ii) The Administrator shall calculate each carrier's local switching support payment, calculated pursuant to 54.301(a), using its historical annual unseparated local switching revenue requirement.

(iii) For each carrier receiving local switching support, the Administrator shall calculate the difference between the support payment calculated pursuant to paragraph (e)(2)(ii) of this section and its support payment calculated using its projected annual unseparated local switching revenue requirement.

(iv) The Administrator shall adjust each carrier's local switching support payment by the difference calculated in paragraph (e)(2)(iii) of this section no later than 15 months after the end of the calendar year for which historical data are submitted.

§ 54.302 Monthly per-line limit on universal service support.

(a) Beginning July 1, 2012 and until June 30, 2013, each study area's universal service monthly support (not including Connect America Fund support provided pursuant to § 54.304) on a per-line basis shall not exceed \$250 per-line plus two-thirds of the difference between its uncapped per-line monthly support and \$250. Beginning July 1, 2013 and until June 30, 2014, each study area's universal service monthly support on a per-line basis shall not exceed \$250 per-line plus one third of the difference between its uncapped per-line monthly support and \$250. Beginning July 1, 2014, each study area's universal service monthly per-line support shall not exceed \$250.

(b) For purposes of this section, universal service support is defined as the sum of the amounts calculated pursu-

ant to §§ 54.1304 and 54.1310, and §§ 54.305, and 54.901 through 54.904. Line counts for purposes of this section shall be as of the most recent line counts reported pursuant to § 54.1306(i).

(c) The Administrator, in order to limit support to \$250 for affected carriers, shall reduce safety net additive support, high-cost loop support, safety valve support, and interstate common line support in proportion to the relative amounts of each support the study area would receive absent such limitation.

§ 54.304 Administration of Connect America Fund Intercarrier Compensation Replacement.

(a) The Administrator shall administer CAF ICC support pursuant to § 51.915 and § 51.917 of this chapter.

(b) The funding period is the period beginning July 1 through June 30 of the following year.

(c) For price cap carriers that are eligible and elect, pursuant to § 51.915(f) of this chapter, to receive CAF ICC support, the following provisions govern the filing of data with the Administrator, the Commission, and the relevant state commissions and the payment by the Administrator to those carriers of CAF ICC support amounts that the carrier is eligible to receive pursuant to § 51.915 of this chapter.

(1) A Price Cap Carrier seeking CAF ICC support pursuant to § 51.915 of this chapter shall file data with the Administrator, the Commission, and the relevant state commissions no later than June 30, 2012, for the first year, and on the date it files its annual access tariff filing with the Commission, in subsequent years, establishing the amount of the Price Cap Carrier's eligible CAF ICC funding during the upcoming funding period pursuant to § 51.915 of this chapter. The amount shall include any true-ups, pursuant to § 51.915 of this chapter, associated with an earlier funding period.

(2) The Administrator shall monthly pay each price cap carrier one-twelfth (1/12) of the amount the carrier is eligible to receive during that funding period.
