§ 61.14

U = [(Average Price Cap CMT Revenue per Line month in a study area * price cap local exchange carrier Base Period Lines) - (25% * Σ (price cap local exchange carrier Base Period Lines in a UNE Zone * ((Loop + Port) for all zones)))] + price cap local exchange carrier Base Period Lines in a study area.

(i) Has an access revenue sharing agreement, whether express, implied, written or oral, that, over the course of the agreement, would directly or indirectly result in a net payment to the other party (including affiliates) to the agreement, in which payment by the rate-of-return local exchange carrier or Competitive Local Exchange Carrier is based on the billing or collection of access charges from interexchange carriers or wireless carriers. When determining whether there is a net payment under this rule, all payments, discounts, credits, services, features, functions, and other items of value, regardless of form, provided by the rate-of-return local exchange carrier or Competitive Local Exchange Carrier to the other party to the agreement shall be taken into account; and

(ii) Has either an interstate terminating-to-originating traffic ratio of at least 3:1 in a calendar month, or has had more than a 100 percent growth in interstate originating and/or terminating switched access minutes of use in a month compared to the same month in the preceding year.

(2) The local exchange carrier will continue to be engaging in access stimulation until it terminates all revenue sharing arrangements covered in paragraph (a)(1)(i) of this section. A local exchange carrier engaging in access stimulation is subject to revised interstate switched access charge rules under § 61.38 and § 69.3(e)(12) of this chapter.
