

§ 69.124 Interconnection charge.

(a) Until December 31, 2001, local exchange carriers not subject to price cap regulation shall assess an interconnection charge expressed in dollars and cents per access minute upon all interexchange carriers and upon all other persons using the telephone company switched access network.

(b) If the use made of the local exchange carrier's switched access network includes the local switch, but not local transport, the interconnection charge assessed pursuant to paragraph (a) of this section shall be computed by subtracting entrance facilities, tandem-switched transport, direct-trunked transport, and dedicated signalling transport revenues, as well as any interconnection charge revenues that the local exchange carrier anticipates will be reassigned to other, facilities-based rate elements in the future, from the part 69 transport revenue requirement, and dividing by the total interstate local switching minutes.

(c) If the use made of the local exchange carrier's switched access network includes local transport, the interconnection charge to be assessed pursuant to paragraph (a) of this section shall be computed by dividing any interconnection charge revenues that the local exchange carrier anticipates will be reassigned to other, facilities-based rate elements in the future by the total interstate local transport minutes, and adding thereto the per minute amount calculated pursuant to paragraph (b) of this section.

[62 FR 66030, Dec. 17, 1997, as amended at 66 FR 59732, Nov. 30, 2001]

§ 69.125 Dedicated signalling transport.

(a) Dedicated signalling transport shall consist of two elements, a signalling link charge and a signalling transfer point (STP) port termination charge.

(b)(1) A flat-rated signalling link charge expressed in dollars and cents per unit of capacity shall be assessed upon all interexchange carriers and other persons that use facilities between an interexchange carrier or other person's common channel signalling network and a telephone company

signalling transfer point or equivalent facilities offered by a telephone company. Signalling link charges may be distance-sensitive. Distance shall be measured as airline kilometers between the signalling point of interconnection of the interexchange carrier's or other person's common channel signalling network and the telephone company's signalling transfer point.

(2) Signalling link rates will generally be presumed reasonable if they are based on the interoffice charges for equivalent special access services. Telephone companies that have, before February 18, 1993, tariffed a signalling link service for signalling transport between the interexchange carrier's or other person's common channel signalling network and the telephone company's STP are permitted to use the rates that are in place.

(c) A flat-rated STP port termination charge expressed in dollars and cents per port shall be assessed upon all interexchange carriers and other persons that use dedicated signalling transport.

[57 FR 54721, Nov. 20, 1992, as amended at 58 FR 41191, Aug. 3, 1993; 58 FR 44950, Aug. 25, 1993; 62 FR 31935, June 11, 1997]

§ 69.128 Billing name and address.

Appropriate subelements shall be established for the use of equipment or facilities that are associated with offerings of billing name and address.

[58 FR 36145, July 6, 1993]

§ 69.129 Signalling for tandem switching.

A charge that is expressed in dollars and cents shall be assessed upon the purchasing entity by a local telephone company for provision of signalling for tandem switching.

[59 FR 32930, June 27, 1994]

§ 69.130 Line port costs in excess of basic analog service.

(a) To the extent that the costs of ISDN line ports, and line ports associated with other services, exceed the costs of a line port used for basic, analog service, non-price cap local exchange carriers may recover the difference through a separate monthly
