

§ 69.125

§ 69.125 Dedicated signalling transport.

(a) Dedicated signalling transport shall consist of two elements, a signalling link charge and a signalling transfer point (STP) port termination charge.

(b)(1) A flat-rated signalling link charge expressed in dollars and cents per unit of capacity shall be assessed upon all interexchange carriers and other persons that use facilities between an interexchange carrier or other person's common channel signalling network and a telephone company signalling transfer point or equivalent facilities offered by a telephone company. Signalling link charges may be distance-sensitive. Distance shall be measured as airline kilometers between the signalling point of interconnection of the interexchange carrier's or other person's common channel signalling network and the telephone company's signalling transfer point.

(2) Signalling link rates will generally be presumed reasonable if they are based on the interoffice charges for equivalent special access services. Telephone companies that have, before February 18, 1993, tariffed a signalling link service for signalling transport between the interexchange carrier's or other person's common channel signalling network and the telephone company's STP are permitted to use the rates that are in place.

(c) A flat-rated STP port termination charge expressed in dollars and cents per port shall be assessed upon all interexchange carriers and other persons that use dedicated signalling transport.

[57 FR 54721, Nov. 20, 1992, as amended at 58 FR 41191, Aug. 3, 1993; 58 FR 44950, Aug. 25, 1993; 62 FR 31935, June 11, 1997]

§ 69.128 Billing name and address.

Appropriate subelements shall be established for the use of equipment or facilities that are associated with offerings of billing name and address.

§ 69.130 Line port costs in excess of basic analog service.

(a) To the extent that the costs of ISDN line ports, and line ports associated with other services, exceed the costs of a line port used for basic, analog service, non-price cap local exchange carriers may recover the difference through a separate monthly end-user charge, provided that no portion of such excess cost may be recovered through other common line access charges, or through Connect America Fund Broadband Loop Support.

(b) The maximum charge a non-price cap local exchange carrier that elects model-based support pursuant to § 54.311 of this chapter or Alaska Plan support pursuant to § 54.306 of this chapter may assess is the rate in effect on the last day of the month preceding the month for which model-based support or Alaska Plan support, as applicable, is first provided.

[81 FR 24345, Apr. 25, 2016, amended at 81 FR 69716, Oct. 7, 2016]

§ 69.131 Universal service end user charges.

To the extent the company makes contributions to the Universal Service Support Mechanisms pursuant to §§ 54.706 and 54.709 of this chapter and the non-price cap local exchange carrier seeks to recover some or all of the amount of such contribution, the non-price cap local exchange carrier shall recover those contributions through a charge to end users other than Lifeline users. The charge to recover these contributions is not part of any other element established pursuant to part 69. Such a charge may be assessed on a per-line basis or as a percentage of interstate retail revenues, and at the option of the local exchange carrier it may be combined for billing purposes with other end user retail rate elements. A non-price cap local exchange
