## §80.1123

traffic channel for 5 minutes. If no distress communications are heard and if the call is not acknowledged by a coast station, the ship shall transmit a distress relay on HF to the coast radio station and inform the Rescue Coordination Center. Distress alert relays to "all Ships" on HF may only be sent by a ship who has knowledge that another ship in distress is not itself able to transmit the distress alert, and the Master of the ship considers that further help is necessary.

- (d) In cases where distress alert continues to be received from the same source, the ship may, after consultation with the Rescue Coordination Center, transmit a DSC acknowledgment to terminate the call.
- (e) A ship station in receipt of a shore-to-ship distress alert relay (see §80.1113(e)) should establish communication as directed and render such assistance as required and appropriate.

 $[57~{\rm FR}~9065,~{\rm Mar}.~16,~1992,~{\rm as}~{\rm amended}~{\rm at}~68~{\rm FR}~46980,~{\rm Aug}.~7,~2003]$ 

## §80.1123 Watch requirements for ship stations.

- (a) While at sea, all ships must maintain a continuous watch:
- (1) On VHF DSC channel 70, if the ship is fitted with a VHF radio installation in accordance with \$80.1085(a)(2);
- (2) On the distress and safety DSC frequency 2187.5 kHz, if the ship is fitted with an MF radio installation in accordance with §80.1089(a)(2) or \$80.1091(a)(3):
- (3) On the distress and safety DSC frequencies 2187.5 kHz and 8414.5 kHz also on at least one of the distress and safety DSC frequencies 4207.5 kHz, 6312 kHz, 12577 kHz, or 16804.5 kHz appropriate to the time of day and the geographical position of the ship, if the ship is fitted with an MF/HF radio installation in accordance with \$80.1091(a)(2)(ii) or \$80.1093(a) of this part (this watch may be kept by means of a scanning receiver limited to six distress and safety DSC frequencies);
- (4) For satellite shore-to-ship distress alert, if the ship is fitted with an INMARSAT ship earth station in accordance with §80.1091(a)(1).
- (b) While at sea, all ships must maintain radio watches for broadcasts of

maritime safety information on the appropriate frequency or frequencies on which such information is broadcast for the area in which the ship is navigating.

- (c) Every ship while at sea must maintain, when practicable, a continuous listening watch on VHF Channel 16. This watch must be kept at the position from which the ship is normally navigated or at a position which is continuously manned.
- (d) On receipt of a distress alert transmitted by use of digital selective calling techniques, ship stations must set watch on the radiotelephone distress and safety traffic frequency associated with the distress and safety calling frequency on which the distress alert was received.
- (e) Ship stations with narrow-band direct printing equipment must set watch on the narrow-band direct-printing frequency associated with the distress alert signal if it indicates that narrow-band direct-printing is to be used for subsequent distress communications. If practicable, they should additionally set watch on the radiotelephone frequency associated with the distress alert frequency.

[57 FR 9065, Mar. 16, 1992, as amended at 68 FR 46981, Aug. 7, 2003; 73 FR 4492, Jan. 25, 2008]

## § 80.1125 Search and rescue coordinating communications.

- (a) The distress signal consists of the word MAYDAY, pronounced in radiotelephony as the French expression "M'aider". For distress traffic by radiotelephony, when establishing communications, calls must be prefixed by the distress signal MAYDAY.
- (b) Error correction techniques, in accordance with ITU-R M.625-3 (incorporated by reference, see §80.7), as specified in §80.1101, must be used for distress traffic by direct-printing telegraphy. All messages must be preceded by at least one carriage return, a line feed signal, a letter shift signal and the distress signal MAYDAY.
- (c) Distress communications by direct-printing telegraphy should be in the ARQ mode when ships are communicating directly to the Coast Guard or other coast stations on channels which
