SUPPLEMENTARY INFORMATION:

I. Abstract

The development of the Research Performance Progress Report (RPPR) resulted from an initiative of the Research Business Models (RBM), an Interagency Working Group of the Social, Behavioral & Economic Research, Subcommittee of the Committee on Science (CoS), a committee of the National Science and Technology Council (NSTC). One of the RBM Subcommittee's priority areas was to create greater consistency in the administration of Federal research awards. Given the increasing complexity of interdisciplinary and interagency research, it is important for Federal agencies to manage awards in a similar fashion. The RPPR is an OMB approved uniform format to be used by Federal agencies in submission of progress reports that support research and research-related activities. It is intended to replace other performance reporting formats currently in use by Federal agencies. However, the RPPR does not change the performance reporting requirements specified in 2 CFR 200.

The Research Performance Progress Report (RPPR) directly benefits award recipients by making it easier for them to administer Federal grant and cooperative agreement programs through standardization of the types of information required in performance reports—thereby reducing their administrative effort and costs. The RPPR also will make it easier to compare the outputs, outcomes, etc. of research and research-related programs across the government.

The RPPR is intended to address progress for the most recently completed period, at the frequency required or designated by the sponsoring agency. Information, once reported, does not have to be provided again on subsequent reports. The RPPR requests various types of information, regarding: accomplishments, products, participants and other collaborating organizations, impact, changes/problems, budgetary information and outcomes.
