

organization ("MCO")² for over-the-counter derivatives instruments ("OTC derivatives")³ if, among other alternatives, it is supervised by a foreign financial regulator that the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, the Securities and Exchange Commission, or the Commission, as applicable, has determined satisfies appropriate standards.

NetThruPut, Inc. ("NTP") has requested that the Commission determine that the oversight of its activities by the Alberta Securities Commission satisfies the criteria for operating as an MCO set forth in Section 409(b)(3) of FDICIA.⁴ NTP intends to operate as an MCO with respect to OTC derivatives transactions to be executed on its online trading platform. NTP's online trading platform provides anonymous trading of crude oil, condensate and other energy contracts.

In its request, NTP provided the Commission with a detailed description of the regulatory program applicable to clearing organizations in Alberta, Canada. NTP also provided the Commission with information comparing the regulatory requirements applicable to NTP and the regulatory requirements applicable to derivatives clearing organizations ("DCOs") in the U.S.,⁵ as set forth in Section 5b of the CEA and Part 39 of the Commission's regulations.⁶ The Commission evaluated the regulatory program of the ASC in the context of the Principles and Objectives

of Securities Regulation issued by the International Organization of Securities Commissions.

In support of NTP's request for relief, the ASC confirmed that:

- The ASC is authorized under the Alberta Securities Act to supervise the clearing of financial instruments by persons located in Alberta, Canada, and has the ability to enforce compliance with the applicable laws, rules and regulations;
- Clearing in Alberta, Canada, of exchange contracts, as defined in the Alberta Securities Act, may be conducted only by a clearing agency recognized by the ASC;⁷
- The clearing of contracts entered into on NTP's online trading platform is subject to regulatory oversight by the ASC;
- The ASC is an associate member of IOSCO, has adopted IOSCO's Principles and Objectives of Securities Regulation, and has established systems consistent with those Principles and Objectives; and
- The ASC has the ability and undertakes to share with the Commission, upon request, information in its possession regarding NTP's activities as a recognized clearing agency and to otherwise cooperate with the CFTC, subject to Alberta law.⁸

Based upon the information and materials submitted by NTP, and the representations made by the ASC, the Commission has determined that the supervision by ASC of an MCO for OTC derivatives operated by NTP satisfies the criteria set forth in Section 409(b)(3) of FDICIA. Any material changes or omissions in the facts and circumstances pursuant to which this Order is issued might require the Commission to reconsider this matter.

Issued in Washington, DC on February 27, 2006.

Jean A. Webb,

Secretary of the Commission.
