

The FERC or its contractor will be contacting individuals to collect specific information about experiences working with the IA and/or agency guidance. We are looking for a broad cross-section of responses—large and small projects; involving multiple agencies or a single agency; and projects involving the Commission's Pre-Filing Process. The information gathered from this assessment will be compiled and presented to the Working Group to assist in determining whether the IA and the signatory agencies' current internal guidelines are furthering the intended goals. The information will also be used to gage whether agencies are fulfilling the expeditious completion of proceedings by issuing the necessary permits or authorizations for natural gas projects.

At this time, we are considering the following projects for our assessment (note this project list may change and is not final):

- *ANR Pipeline Company*: West Leg Project, (CP02-434-000);
- *Columbia Gas Transmission Corporation*: Line 1278 Replacement Project, (CP04-34-000);
- *Transwestern Pipeline Company*: San Juan 2005 Expansion, (CP04-104-000);
- *Golden Pass LNG*: Golden Pass LNG Project, (CP04-386-000);
- *Vista del Sol LNG*: Vista del Sol LNG Project, (CP04-395-000);
- *Northwest Pipeline Corporation*: Northwest Capacity Replacement Project, (CP05-32-000); and
- *Entrega Gas Pipeline, LLC*: Entrega Pipeline Project, (CP04-413-000).

Title: General Hazardous Waste Facility Standards (Renewal).

ICR numbers: EPA ICR No. 1571.08, OMB Control No. 2050-0120.

ICR status: This ICR is currently scheduled to expire on February 28, 2006. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Section 3004 of the Resource Conservation and Recovery Act (RCRA), as amended, requires that the U.S. Environmental Protection Agency (EPA) develop standards for hazardous waste treatment, storage, and disposal facilities (TSDFs) as may be necessary to protect human health and the environment. Subsections 3004(a)(1), (3), (4), (5), and (6) specify that these standards include, but not be limited to, the following requirements:

- Maintaining records of all hazardous wastes identified or listed under subtitle C that are treated, stored, or disposed of, and the manner in which such wastes were treated, stored, or disposed of;
- Operating methods, techniques, and practices for treatment, storage, or disposal of hazardous waste;
- Location, design, and construction of such hazardous waste treatment, disposal, or storage facilities;
- Contingency plans for effective action to minimize unanticipated damage from any treatment, storage, or disposal of any such hazardous waste; and
- Maintaining or operating such facilities and requiring such additional qualifications as to ownership, continuity of operation, training for personnel, and financial responsibility as may be necessary or desirable.

The regulations implementing these requirements are codified in the *Code of Federal Regulations* (CFR) Title 40, parts 264 and 265. The collection of this information enables EPA to properly determine whether owners/operators or hazardous waste treatment, storage, and disposal facilities meet the requirements of Section 3004(a) of RCRA.

Burden Statement: The annual public reporting burden for this collection of information is estimated to average 185 hours per response, and the annual public recordkeeping burden for this collection of information is estimated to average 254 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Business or other for profit.

Estimated Number of Respondents: 1,531.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 652,312.

Estimated Total Annual Cost: \$45,907,000, which includes \$13,000 annual capital/startup costs, \$629,000 annual O&M costs and \$45,265,000 annual labor costs.

Changes in the Estimates: There is a decrease of 66,747 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. EPA believes that this lower burden reflects a more accurate portrait of the existing burden on the regulated community.

Dated: February 27, 2006.

Oscar Morales,

Director, Collection Strategies Division.
