

- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply. For example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

The Agency is requesting an adjustment increase in the number of burden hours from 54,393 to 56,276 hours (a total increase of 1,883 hours). The increase is a result of the Agency's estimate, based on updated data, that the number of establishments and workers affected by the Standard has increased. The increase in the number of medical exams, and the increase in the cost of medical exams (from \$180 to \$196) has resulted in an increase of \$539,194 in costs (from \$4,733,010 to \$5,272,204). Due to lower prices for dosimeters, the total cost for exposure monitoring declined by \$1,503,465 (from \$14,648,715 to \$13,145,250), despite the number of employees being monitored with dosimeters increasing from 51,399 to 52,581.
