

Healthcare workers are nearly five times more likely to be victims of violence than workers in all industries combined.

While healthcare workers are not at particularly high risk for job-related homicide, nearly 60% of all nonfatal assaults occurring in private industry are experienced in healthcare. Six states have enacted laws to reduce violence against healthcare workers by requiring workplace violence prevention programs.

However, little is understood about how effective these laws are in reducing violence against healthcare workers.

The long-term goal of the proposed project is to reduce violence against healthcare workers. The objective of the proposed study is: (1) To examine

nursing home compliance with the New Jersey Violence Prevention in Health Care Facilities Act, and (2) to evaluate the effectiveness of the regulations in this Act in reducing assault injuries to nursing home workers. Our central hypothesis is that nursing homes with high compliance with the regulations will have lower rates of employee violence-related injury. NIOSH received OMB approval (0920–0914) to evaluate the legislation at 50 hospitals and at 40 nursing homes, to conduct a nurse survey and to conduct a home healthcare aide survey. Data collection is complete for the hospitals, the nurse survey, and the home healthcare aide survey. We have completed 20 out of 40 nursing home interviews. We still have

20 nursing home interviews to complete.

CDC will conduct face-to-face interviews with the Chairs of the Violence Prevention Committees in 20 nursing homes (10 in New Jersey and 10 in Virginia) who are in charge of overseeing compliance efforts. The purpose of the interviews is to measure compliance to the state regulations: Violence prevention policies, reporting systems for violent events, violence prevention committee, written violence prevention plan, violence risk assessments, post incident response and violence prevention training. A contractor will conduct the interviews.

There are no costs to respondents other than their time. The total estimated burden hours are 40.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
Nursing Home Administrators	Interview	20	1	1
Nursing Home Administrators	Abstraction	20	1	1

Leroy A. Richardson,

Chief, Information Collection Review Office,

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled Healthy Homes and Lead Poisoning Surveillance System (HHLPPS) to the Office of Management and Budget (OMB) for review and approval. CDC previously published a “Proposed Data Collection Submitted for Public Comment and Recommendations” notice on [November 8, 2017] to obtain comments from the public and affected agencies. CDC did not receive comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570 or send an email to omb@cdc.gov. Direct written comments and/or suggestions regarding the items contained in this

notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Healthy Homes and Lead Poisoning Surveillance System (HHLPPS) (OMB Control Number 0920–0931, expires 05/31/2018)—Extension—National Center for Environmental Health (NCEH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The overarching goal of HHLPPS is to support healthy homes surveillance activities at the state and national levels. CDC seeks to request an OMB approval to extend the project for 18-months for up to 40 state and local Healthy Homes Childhood Lead Poisoning Prevention Programs (CLPPP) and the state-based Adult Blood Lead Epidemiology and Surveillance (ABLES) programs. The state programs will report information (e.g., presence of lead paint, age of housing, occupation of adults and type of housing) to the CDC under a one-year cost extension of the FY14 Funding Opportunity Announcement (FOA No. CDC–RFA–14–1408) titled “(PPHF) Childhood Lead Poisoning Prevention.” The 18-month extension will allow CDC to collect data for the third year

supplement which represents the fourth and final year of awardee blood lead surveillance data under this program announcement.

Over the last three years, seven states have adopted the HHLPS and 13 are in beta-testing. Since October 2014, CDC has funded up to 40 state and local blood lead surveillance programs. All of these programs or their subcontractors at the local level are submitting lead surveillance data for an additional year.

The objectives for this surveillance system remain two-fold. First, the HHLPS allows CDC to systematically track how the state and local programs conduct case management and follow-up of residents with housing-related health outcomes. Second, the system allows for identification and collection of information on other housing-related

risk factors. Childhood and adult lead poisoning is just one of many adverse health conditions that are related to common housing deficiencies. Multiple hazards in housing (e.g., mold, vermin, radon and the lack of safety devices) continue to adversely affect the health of residents. HHLPS offers a coordinated, comprehensive, and systematic public health approach to eliminate multiple housing-related health hazards.

HHLPS enables flexibility to evaluate housing where the risk for lead poisoning is high, regardless of whether children less than 6 years of age currently reside there. Thus, HHLPS supports CDC efforts for primary prevention of childhood and adult lead poisoning. Over the past several decades there has been a remarkable reduction

in environmental sources of lead, improved protection from occupational lead exposure, and an overall decreasing trend in the prevalence of elevated blood lead levels (BLLs) in U.S. adults. As a result, the U.S. national BLL geometric mean among adults was 1.2 µg/dL during 2009–2010. Nonetheless, lead exposures continue to occur at unacceptable levels. Current research continues to find that BLLs previously considered harmless can have harmful effects in adults, such as decreased renal function and increased risk for hypertension and essential tremor at BLLs <10 µg/dL.

There is no cost to respondents other than their time. The total estimated time burden hours is 640 hours. There are no changes to the requested burden hours or the data collection.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
State, Local, and Territorial Health Departments.	Healthy Homes and Lead Poisoning Surveillance System (HHLPS) Variables.	40	4	4

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day-18-1050; Docket No. CDC-2018-0023]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing efforts to reduce public burden and maximize the utility of government information, invite the general public and other Federal agencies the opportunity to comment on a proposed and/or continuing information collection, as required by the Paperwork Reduction Act of 1995.

This notice invites comment on proposed information collection projects under a mechanism titled *Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery*. CDC currently collects agency service delivery data under the following Office of Management and Budget (OMB) Control numbers:

- 0920-0940
- 0920-0953
- 0920-0974
- 0920-1009
- 0920-1027
- 0920-1050
- 0920-1071

The information collection activities provide a means to garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Federal government's commitment to improving service delivery.

DATES: CDC must receive written comments on or before May 22, 2018.

ADDRESSES: You may submit comments, identified by Docket No. CDC-2018-0023 by any of the following methods:

- **Federal eRulemaking Portal:** *Regulations.gov*. Follow the instructions for submitting comments.
- **Mail:** Leroy A. Richardson, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road, NE, MS-D74, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *Regulations.gov*.

Please note: Submit all comments through the Federal eRulemaking portal (*regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Leroy A. Richardson, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS-D74, Atlanta, Georgia 30329; phone: 404-639-7570; Email: *omb@cdc.gov*.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the
