Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

*Needs and Uses:* In response to the events of September 11, 2001, the Federal Communications Commission (Commission or FCC) created an Emergency Contact Information System to assist the Commission in ensuring rapid restoration of communications capabilities after disruption by a terrorist threat or attack, and to ensure that public safety, public health, and other emergency and defense personnel have effective communications services available to them in the immediate aftermath of any terrorist attack within the United States. The Commission submitted, and OMB approved, a collection through which key communications providers could voluntarily provide contact information. The Commission's Public Safety and Homeland Security Bureau (PSHSB) developed the Disaster Information Reporting System (DIRS) that uses electronic forms to collect Emergency Contact Information forms and through which participants may inform the Commission of damage to communications infrastructure and facilities due to major emergencies and may request resources for restoration. The Commission updated the process by increasing the number of reporting entities to ensure inclusion of wireless, wireline, broadcast, cable, VoIP, and broadband internet access communications providers. The Commission is requesting a renewal of the currently approved collection. It is imperative that the Disaster Information Reporting System be in place so that the Commission has an accurate picture of the communications landscape during disasters.

Statutory authority for this collection of information is contained in 47 U.S.C. 154(i), 218, 303(r) and 47 CFR Section 0.181(h).

**Needs and Uses:** The *Restoring Internet Freedom Report and Order (Restoring Internet Freedom Order)* revises the information collection requirements applicable to Internet service providers (ISPs). The *Open Internet Order*, adopted in 2010, required ISPs to disclose certain network management processes, performance characteristics, and other attributes of broadband Internet access service. These disclosure requirements were significantly increased by the *Title II Order*, adopted in 2015. The *Restoring Internet Freedom Order* eliminates the additional collection imposed by the *Title II Order* and adds a few discrete elements to the *Open Internet Order's* information collection requirements. The *Restoring Internet Freedom Order* requires an ISP to publicly disclose network management practices, performance, and commercial terms of its broadband internet access service sufficient to enable consumers to make informed choices regarding the purchase and use of such services, and entrepreneurs and other small businesses to develop, market, and maintain internet offerings. As part of these disclosures, the rule requires ISPs to disclose their congestion management, application-specific behavior, device attachment rules, and security practices, as well as any blocking, throttling, affiliated prioritization, or paid prioritization in which they engage. The rule also requires ISPs to disclose performance characteristics, including a service description and the impact of non-broadband internet access services data services. Finally, the rule requires ISPs to disclose the price of the service, privacy policies, and redress options. The rule requires ISPs to make such disclosure available either via a publicly available, easily accessible website or through transmittal to the Commission,

which will make such disclosures available via a publicly available, easily accessible website. The information collection will assist the Commission in its statutory obligation to report to Congress on market entry barriers in the telecommunications market. The Commission anticipates that the revised disclosures will empower consumers and businesses with information about their broadband internet access service, protecting the openness of the internet. Although this collection was bifurcated in 2016 with respect to fixed and mobile ISPs, the Commission seeks to have this collection encompass both fixed and mobile ISPs.
