**SUPPLEMENTARY INFORMATION:** EPA is submitting the Nanotechnology White Paper External Review Draft for independent, external peer review. On December 21, 2006, the draft document was announced in the **Federal Register** (70 FR 75812) and made available for a public comment period that ended January 31, 2006. The comment period

was subsequently extended to March 1, 2006 (71 FR 6774, February 9, 2006). Public comments received in the docket will be shared with the external peer review panel for their consideration. Although EPA is under no obligation to do so, EPA may consider comments received after the close of the comment period. The public release of this draft document is solely for the purpose of seeking public comment and peer review. This draft white paper does not represent and should not be construed to represent any EPA policy, viewpoint, or determination.

The Nanotechnology White Paper External Review Draft identifies data gaps that need to be filled and recommends research for both environmental applications and implications of nanotechnology that would inform the appropriate regulatory safeguards for nanotechnology. The draft white paper describes the technology and provides a discussion of potential environmental benefits of nanotechnology. Risk management issues and the Agency's statutory mandates are outlined, following an extensive discussion of risk assessment issues. The draft white paper concludes with recommendations on next steps for addressing science policy issues and research needs. Supplemental information is provided in a number of appendices. Following the expert external peer review, EPA plans to issue a final white paper on nanotechnology in mid-2006.
