

individuals were removed from Gloucester in Essex County, MA. A document with items reads, "Sawyer Gloucester Free Library Excavations, 1974, medical study collection." The associated funerary object is one lot of faunal remains.

Around 1950, human remains representing, at minimum, one individual were removed from Ipswich in Essex County, MA (Site ES15). William Eldridge is associated with the collection of these remains in the 1950s. The human remains were received March 2, 1982. The human remains include fragmentary cranial remains and a jaw fragment of an adult of unknown sex and age. No known individuals were identified. No associated funerary objects are present.

In 1882 and 1884, human remains representing, at minimum, four individuals were removed from a shell midden excavated on Treadwell's Island, Ipswich, Essex County, MA (SITE ES178). In 1882, human remains were collected or donated by (on different occasions) Sears, Potter, J.R., R.L., Gallagar, Robinson, the Peabody Academy of Science party, and the Essex Institute party. In June 1884, human remains were collected and donated by O. Clifton Willcomb. The human remains include fragmentary post cranial remains of an adult of unknown sex; fragmentary cranial and post cranial remains of an adult and a child 8–10 years of age, both of unknown sex; and partial cranial and post cranial remains of an adult male, 50–59 years of age. In 1980, human remains representing, at minimum, 15 individuals were removed from the path of bulldozers at a dump at the Ipswich sewer treatment in Ipswich in Essex County, MA. William Eldridge (on some occasions accompanied by John Grimes, Jeff Lalish, and Beth Lalish), oversaw the removal of the human remains. The human remains were placed at the Peabody Essex Museum where Grimes was then a curator. The human remains include a cranial fragment and femur; pelvis fragment and rib fragment; left temporal fragment, right temporal fragment, zygoma fragment, four cranial fragments, and phalange fragment; and a vertebrae fragment. According to the information provided by the Wampanoag Confederation, linguistically, this area is within the so-called n-dialect shared by Massachusetts, Wampanoag, and Pokanoket speakers. Furthermore, sociopolitical and economic patterns in the coastal area of Rhode Island and Massachusetts were established by the late Woodland period circa A.D. 1000, and the coastal groups in the area are likely the ancestors of the Wampanoag people encountered by the English in the seventeenth century. Archeology, ethnohistory, linguistics, and oral history provide multiple lines of evidence that demonstrate longstanding ties between the Wampanoag and the area around Essex County, and affirm cultural affiliation with the sites listed in this notice.

Determinations Made by the Peabody Essex Museum
